Farm Updates :

The nimbooz continue to be amazing.

Abhi minjar hai - bada hoke Aam banega

Onions look healthy. Not sure about the rates when harvested

Yeh Aloe Vera island - it provides full year of sabzi, juices & skin care for the family.

This one would gladden @zenrainman Sir. It gladdens me too.

#Groundwater

The imli lives in bunches.

Finally, the heart of the farm. Irrigation system & water filter.

Also: don't miss the resident GOD ji ■

Updates continue :

You've seen the goodie good - now the underbelly, the ugly stuff :

Xamthomonas Anoxopodis pv citri of Nimbooz.

In simple terms - bacterial blight.

In simpler terms : Hindutva zealots.

Equally dangerous & corrupt for a healthy plant / society

I've already given instructions & protocol for control and management of the blight. And, a possible eradication.

Sadly, I've no power to do likewise with the societal blight :((
