OUR MISSION

Making commerce better for everyone

We help people achieve independence by making it easier to start, run, and grow a business. We believe the future of commerce has more voices, not fewer, so we're reducing the barriers to business ownership to make commerce better for everyone.

OWNERSHIP OF SECURITIES

The following table sets forth certain information regarding the beneficial ownership of Tesla's common stock, as of December 31, 2019, for the following:

- each person (or group of affiliated persons) who is known by us to beneficially own 5% of the outstanding shares of our common stock;
- each of our non-employee directors;
- each of our current executive officers named in the Summary Compensation Table of this proxy statement; and
- all current directors and executive officers of Tesla as a group.

In computing the number of shares of common stock beneficially owned by a person and the percentage ownership of that person, we deemed to be outstanding all shares of common stock subject to options or other convertible securities held by that person or entity that are currently exercisable or exercisable within 60 days of December 31, 2019. We did not deem these shares outstanding, however, for the purpose of computing the percentage ownership of any other person. Applicable percentage ownership is based on 181,062,086 shares of Tesla's common stock outstanding at December 31, 2019.

Unless otherwise indicated, all persons named below can be reached at Tesla, Inc., 3500 Deer Creek Road, Palo Alto, California 94304.

Includes 18,466,225 shares pledged as collateral to secure certain personal indebtedness.

I received a TON of great replies to this thread

but this one by @OphirGottlieb stood out:

<https://t.co/RNna2KxaRv>

Put fin statements down, they're known, offer no alpha for discovering new company.

Put scanners, charts down.

Figure out:

1. What is changing
2. What is not changing
3. Is there an underappreciation for either

Do that well, move on #3, you're the best investor in the world
