@Foone

this game definitely didn't have any problems in localization

ahh yes, I remember when my father went off to look for the dragon
(Brain Lord by Enix)

I'm just looking through SNES RPGs for ones that'd be good for the generator.
This is Arcana.

The pouch is empty!
This is Brandish

Breathe of Fire

or rather, Breath of Fire.
it's late.

And here's Breath of Fire 2! As you can see, both of them only let me be Foon, not Foone.

every part of Drakkhen screams "I was a port from another system", but it's got some OK fonts. might be good for a generator

Dragon View is Drakkhen 2.
The font is a bit boring

Final Fantasy: Mystic Quest.

Kinda boring out of context, probably wouldn't make a great generator.

Inindo has a neat font, but that semi-transparentness makes for terrible generators

Remember when Interplay made a LOTR game for the SNES?
It's JRR Tolkien's The Lord of the Rings - Volume One

Lagoon

Lufia.
This one is definitely on the to-do list already

Along with Lufia II

Might & Magic III got ported to the SNES. It's got a boring font here.

Paladin's Quest.
I looked into doing this one before, but the font is kinda boring

Robotrek.
Kinda interesting font, might be a good choice!

Secret of Mana is a classic but it's got that semi-transparent background again

Secret of the Stars.
BORING FONT

I don't seem to have The 7th Saga on hand, but from the screenshots I see online, it's got semi-transparent dialog boxes

Super Ninja Boy.
the text in the intro maybe, but the in-game dialogue, no

The Twisted Tales of Spike McFang: Generic font, tiny dialog box, transparent background.
That's THREE STRIKES

A couple Ultimas got ported to the SNES, but one is original: Runes of Virtue 2.

Not a good fit, though.

Ys III

Not really.

ran out of SNES, switched to NES.
Swords and Serpents might be alright. the guy is amusing

The Magic of Scheherazade a lot of portraits. Might be good

Dungeon Magic - Sword of the Elements might be good, with the little dialog boxes

Faria isn't going to be good for twitter because of the aspect ratio but it's gonna be worth it for this portrait alone

oh god does everyone in this game look like this

And someday I gotta add some game in the Dragon Quest/Dragon Warrior series, by law.
(shown here: Dragon Warrior 1)
