From 1850 to 1990\$ - the GOLD is getting more interesting. I will be adding up more if the resistance is taken off and the price follows through.

**GOLD** <https://t.co/l6pEGDpAkL>

Most interesting chart:

Orange line = Gold

Blue Curve = Gold/S&P 500

Previously the ratio crossed 50 days MA in Feb' 20 with Gold giving a breakout on the charts. The previous cross of 50 days MA didn't result in gold breaking out. [pic.twitter.com/HRG1fvsILp](https://pic.twitter.com/HRG1fvsILp)
