Infinitions

@Infinitions1

4.3 billion people use Google every day.

But 99.9% of them don't know how to search Google properly.

Here are 15 tips to use Google more efficiently:

Use quotes

When searching for something specific: use quotes.

Search: Sun the perineum

And the engine will search for content that contains those 3 words in any order.

But if you search "Sun the perineum" it will search for that phrase exactly as you typed it.

In the post, **Elon Musk** shared 'his reactions' to the twists and turns in the **Twitter** takeover saga.

Use a hyphen to exclude words

Using "-" excludes words or phrases from the results.

Search: Rocky -film

Will show results related to 'rocky' in general but not the film Rocky.

Perform a Reverse Image Search

This function allows you to upload an image file and find information on that image.

Eg: if you uploaded a picture of the Eiffel Tower

Google will recognize it and give you information on the Paris monument.

Add a tilde (~) in front of a word to find synonyms

If you search for iPhone ~cheap

You will also get results for "iPhone inexpensive," and so forth.

Use Google search to do math

Perhaps my go-to feature.

Whether it's converting currencies

Dividing a big number

Or even calculating the square root of 4761

Google has you covered.

Leverage Google Shortcuts

- Weather *zip code* – This will show you the weather in the given zip code
- Time *place* – This will display the time in whatever place you type in.
- Define: *word* – This will display the definition of a word.
- Sunrise/Sunset *city*

Use an asterisk in place of words you do not know.

If you forget things and words easily, * will come to your rescue.

Search: imagine all * for today

And google will give you John Lenon on a silver platter.

Do you want to make rational decisions?

Do you want to live a happy life?

Do you want to build a successful business?

You need mental models to achieve them.
