My two cents on this important article from @David_Philipps. I've been trying to tell people for years now that SOF has absolutely no special ability to resist attacks on their cognitive spaces. We have no special training to deal with

I first started noticing this during the Obama admin as I was watching Special Forces veterans (mostly on Facebook) jump onboard with clear Russian propaganda, the source was not even concealed. These were Cold Warriors, now worshipping Putin as a defender of Christianity.

It was absolutely bizarre watching people who I thought should know better salivate over a foreign dictator while they decried Obama as a usurper undermining the fabric of America. Putin was the strong white man, Obama was the secret Muslim. Their minds had been captured.
