We need answers and accountability. The US **Capitol** was attacked while our elected officials and the VP were all inside way too easily. It took backup FOREVER. People committing in one of our **sacred** places federal felonies WALKED OUT. We need to know how that happened.

I'm heartbroken and disgusted. This **sacred** building and the very pillars of our American democracy were attacked. My years spent working in the **Capitol** were transformative and I wouldn't be who I am today without them. I have a deep faith in this institution & the road forward.

Capital Chick
@acapitalchick

As an idealistic college kid, one of my jobs as a hill intern was to give tours of the **Capitol** building when constituents visited.

It was my favorite thing to do. As imperfect as our country has always been, it felt like a **sacred** place for all of us.

Today all I can do is cry.

U.S. Capitol security needs a total overhaul. The physical breaching and desecration of our temple of democracy must never happen again. This was plainly a failure.
