I strongly suspect it is going to be shocking how many people working on the inside of our government and law enforcement were aware of, and helped, the insurrection on Wednesday.

From Congress to the White House to law enforcement and military - this was coordinated and funded.

I am sure the FBI is doing a deep dive into anyone and everyone and I think it is going to be shown that they were trying to kill as many people as possible, leaving Trump as a Designated Survivor who has to remain in office.

It is worse than anyone thought. I am sure.

I am almost positive that there were paramilitary and hired mercenaries blended in with the group who had the floorplans in advance, had tactical teams ready to go.

Hello, zip tie guy? These guys were ready to take hostage and murder on live tv.

We must find out who funded them. Who coordinated. Who sent them Capitol plans.

We must get electronic records, phone records, etc for White House staff that are known to symapthize (Scavino, Miller, Meadows, Kushner, Trump Jr).

There is a "there" there.

We also need to get electronic records from various Congress members AND their staff who may have been assisting from the inside. Too many to list, but there are A LOT.

These folks were too calm. They didn't seem worried about their personal safety. They knew they were fine.

Cruz, Hawley, Nunes, etc...these guys were not rattled. That is ODD to me.

I have been to the Capitol a few times and it is HUGE. You need to ask someone just to find a bathroom. But these guys KNEW where they were going. Not all, but a handful. They were the real danger. 90% were just idiot rioters. 10% were there to kill.

And let me add - I am not into conspiracy theories. But I did work in LE and this just stinks of an inside job. Too many things that had to be coordinated.

They had to plan for a large enough crowd to allow the mercenaries to blend. And they did. Timed entry. Crowd blending.

And if I am right, there is no way this is ending yet. They are determined to finish their mission.

I have seen others strongly suggest the inauguation be held at a secure location (I think @sarahkendzior) and I COMPLETELY AGREE.

Get Biden in, safely. Then BREAK SHIT DOWN.

Sure, they can build barriers and have guys with guns outside the Capitol, but if there are agents working on the INSIDE, how does that help? All it takes is one or two INSIDE agents to finish the job.

Again, not a conspiracy theory. Just a REAL question.
