There are a few points we need to discuss about how this year has begun and where we're heading in the immediate future.

This is 2021 and your world is about to change drastically, so get prepared for the struggle that will ensue.

The Great Reset is officially upon us.

1/12

The "storming" of Capitol Hill was a defining moment, not because it was real, but because of how it will be used.

As @_WhitneyWebb has already been warning, the US intelligence were already looking to pivot from international terror threats to domestic terror.

2/12

To concentrate on domestic terror, those in power needed an event that they could allow them to label any anti-globalist Americans as "domestic terrorists".

They stood down part of the D.C. police knowing that the peaceful protests would spill over into a minor skirmish.

3/12

Those who organised this debacle risked the lives of their police officers & innocent protesters by undermanning the security on Capitol Hill.

They now call it a coup attempt, infiltration & sedition. But it was really a disorganised rabble, many with legitimate issues.

4/12

The MSM have hyped up this event as though it was the end of US democracy & ironically that's exactly what it signalled, but not in the way they portray it.

All world governments are planning to end most democratic processes, many of which have been suspended due Covid.

5/12

Anybody who fights against the end of democratic processes will be labelled a conspiracy theorist & will be swiftly criminalised.

This move will wake up many people. Our society will begin to fracture. This fracturing will be used an excuse to remove people's voting rights. 6/12

Some countries will see revolutionaries rise, others will head towards civil war.

The people in power have already planned out their responses to any attempt at liberation from their anti-democratic systems. Next we'll see the extermination of those who refuse to bow down.

7/12

In the 2nd/3rd quarter of 2021, the FED will abruptly stop the melt up in the stock market. They have been building a bubble for two years.

In about July/August, there will be a financial crisis like we've never seen before.

They will then introduce their new systems.

8/12

Calls will come for the elites to have more control over the average citizens.

Police forces & public services will mostly be taken over by intelligence companies like Palantir, Carbyne911, Darktrace & Cybereason who will use forms of A.I. tech to surveil the population.

9/12

In the next year, we will also see mass blackouts in many countries.

These blackouts will be described as cyberattacks from the usual hostile nations, but in reality the blackouts will be enacted by our own governments in an effort to control large dissenting populations. 10/12

This is what the Great Reset will look like. Many people will become homeless & starve, while others will be locked up.

Those who voted for the current rulers have voted for an end to democracy. You've allowed people like Biden, Johnson & others to destroy the free world. 11/12

There are no leaders who can change it all, there is no miracle. You have voted for pedophiles & murderers. You were warned about them but you decided to remain in your pristine little bubbles.

You have voted for the end of liberty & democracy. You had been warned.

12/12
