Okay, so... let's start going down the list. Who is really behind the False Flag storming of the Capitol on Jan 6th, and who is behind the onslaught of social media attacks? My short list of possible culprits.

Former CIA Director John Brennan
Retired Gen. Stanley McChrystal
...

My money is on Brennan for directing the whole thing.

Retired Gen Stanley McChrystal on the other hand, seems to be disgraced and out of service.

McChrystal directed the usage of DARPA software used to disrupt ISIS, by Democrats, against Republicans

This article about Jack Dorsey's connections to the Clintons and the CIA is enlightening to say the least.

We knew back in 2018 that Twitter was run by Dem donors and activists.

Same for Facebook.

And for that matter, most of Silicon Valley.

But here's where the rubber really meets the road. A Kamala Harris staffer, Nick Pacilio, was responsible for censorship of the Trump Twitter account.

Yoel Roth, Twitter “Head of Site Integrity,” and known for fact-checking Trump, has a long history of anti-Trump tirades.

That's all I've got for now. If you know of more sources and connections relating to censorship of Trump and his supporters feel free to chime in.

LATE EDIT: And then I think to myself... where else does the rubber meet the road?

We have the case of the CCP-Honeypot-Connected Eric Swalwell who was named as the Impeachment Manager. A very direct CCP connection to the Capitol Hill riot and clear motive to goad on that riot.

And who else indeed benefits? Liz Cheney chiming in, calling for Trump's ouster, at the behest of her Neocon overlords, attempting to wrest control of the Republican Party to start more wars without end, to sell more war material we don't need!

This thread by @Twinity5 goes into much greater detail as to how the false flag was coordinated.
