Leftists accused me of tin foil hattery for writing communists already took over America. Look what Washington Post published today:

New Demshevik Party narrative spread by their most loyal attack dog Washington Post: the GOP and the 75 million people who support Trump are potential terrorists, similar to the Lebanese terror organization Hizb'Allah.

For those who don't remember or were not born at the time, Hizb'Allah or Hezbollah perpetrated the 1983 Beirut bombing that killed 200+ Marines. This act forced the US and UN to pull out their peace keeping forces and started the civil war that turned Lebanon into ruins.

By calling the GOP a terrorist organization, the communists running today Democratic Party are using the same old but proven tactic of communist/fascist demonization and de-humanization of their political enemies.

Portraying political enemies in the subservient media as a group of soulless terrorists and irreconcilable enemies capable of mass murdering innocent people is a tactic long used by totalitarian communist and fascist regimes...

to inflame the public opinion against certain categories of people and social categories (like for example the bourgeoisie, the Jews, Gypsies, Tutsi, Bosnians, Armenians, kulaks, clergy, dissident writers and other intellectuals).

This kind of propaganda always worked to inflame and convince a majority of the low information population support illegal surveillance and repressive violent action including arrests, imprisonment and mass killings.

This is how genocides always started whether they happened the Soviet Union and Eastern Europe during the Cold War, in Nazi Germany in Africa, in Yugoslavia, in Turkey, in communist China, in Cuba, Cambodia and many other places.

Communists are in full preparation for what they have planned for us next: the egg breaking they consider necessary for the cooking of the socialist omelette.
And we are the eggs, my friends.

Below is the testimony of the former member of the communist / Maoist terrorist organization Weather Underground and FBI informant Larry Grathwohl in the 1982 documentary No Place to Hide.
https://t.co/teztqXYyAf

Of the twenty five people he talks about, two names may sound familiar to you.
They are the Weather Underground leaders, Bill Ayers and Bernadine Dohrn.

Obama's neighbors: Bill Ayers and Bernardine Dohrn when wanted by the FBI, and today as "respected" college professors in Chicago.

They are the same people who launched Barack Obama's political career by announcing his candidacy to the IL Senate and organized his first fundraising in their own home living room.
They are Obama's political godfather and godmother.
