@EOwhit

I do time's inbetween tweets, take the results, translate the time variations back to the boards. I'll explain and illustrate the best I can. This is gonna be a long one. We'll use the orthodox method, then I'll illustrate another re-read using "keys"?. Here we go!

Looking at 3rd Special Forces, these two. Both of these are Rt's. One done one the 13th at 10:04am. The next one is the same thing, diff time/org. A day before 12th, at 21:29.

So this is what the math looks like. Tools make it easier.

So 12 hours 35m is now drop 1235. Time variations as follows, 1258, 755, 453 (and 1235).

Time Calculator

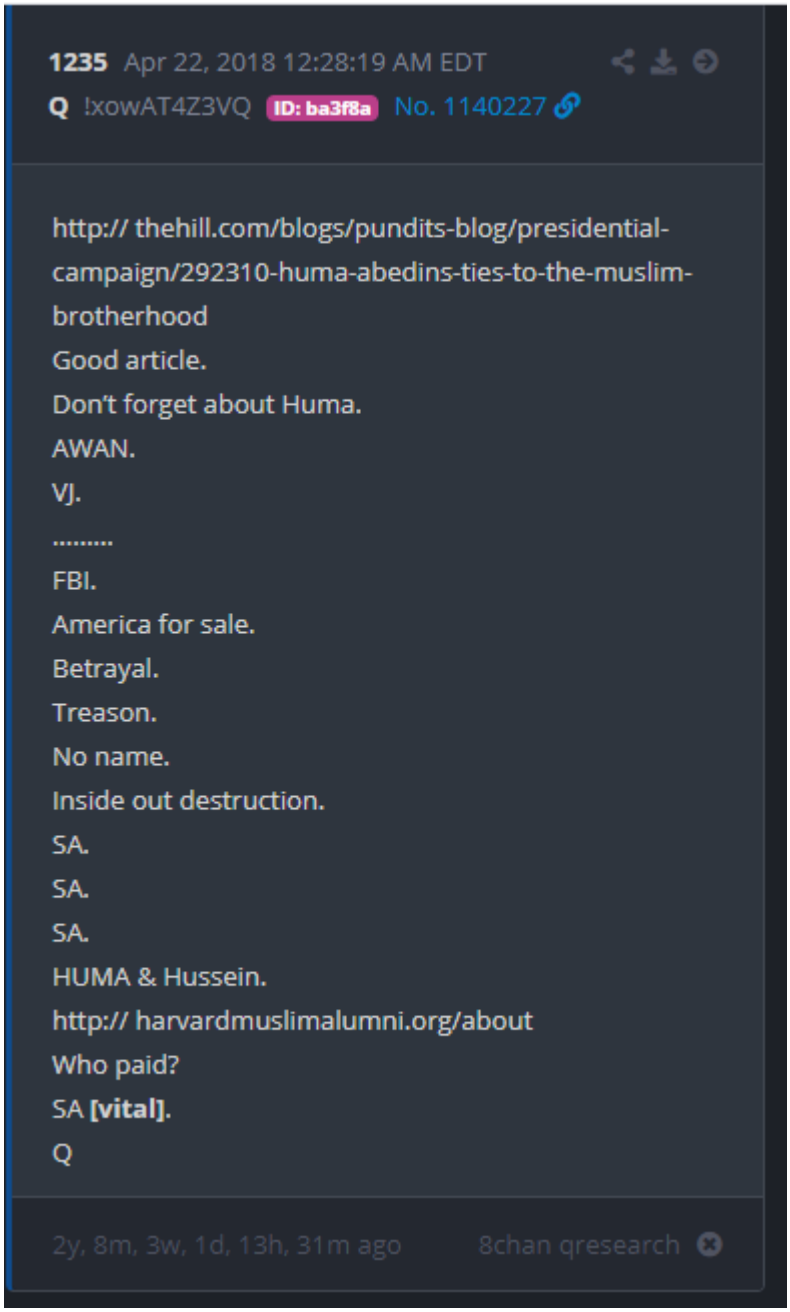

This calculator can be used to "add" or "subtract" two time values. Input fields can be left blank, which will be taken as 0 by default.

Result

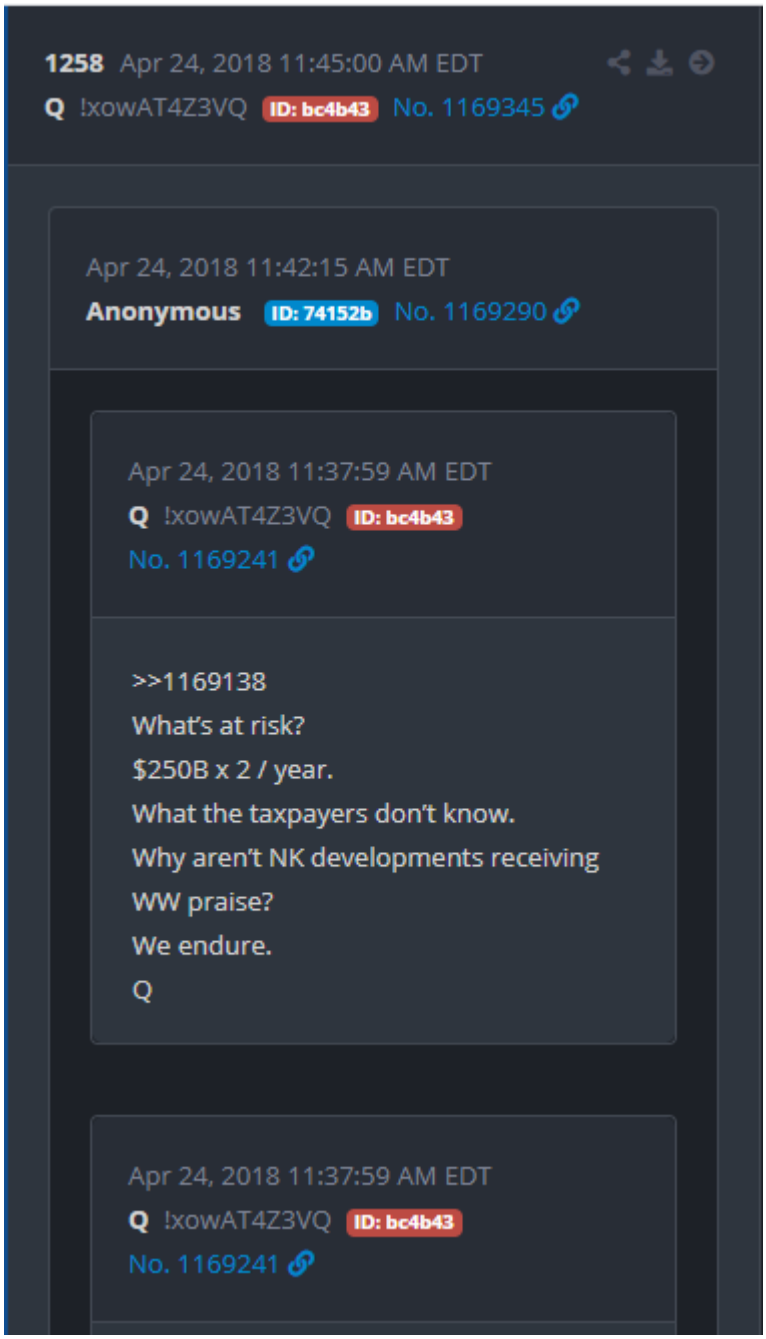

13 days 10 hours 04 minutes 0 seconds
- 12 days 21 hours 29 minutes 0 seconds
= 0 days 12 hours 35 minutes 0 seconds
= 0.524306 days
= 12.58333 hours
= 755 minutes
= 45,300 seconds

Day	Hour	Minute	Second
13	10	04	0
	○ Add+ ◉ Subtract–		
12	21	29	0
	=		
	12	35	

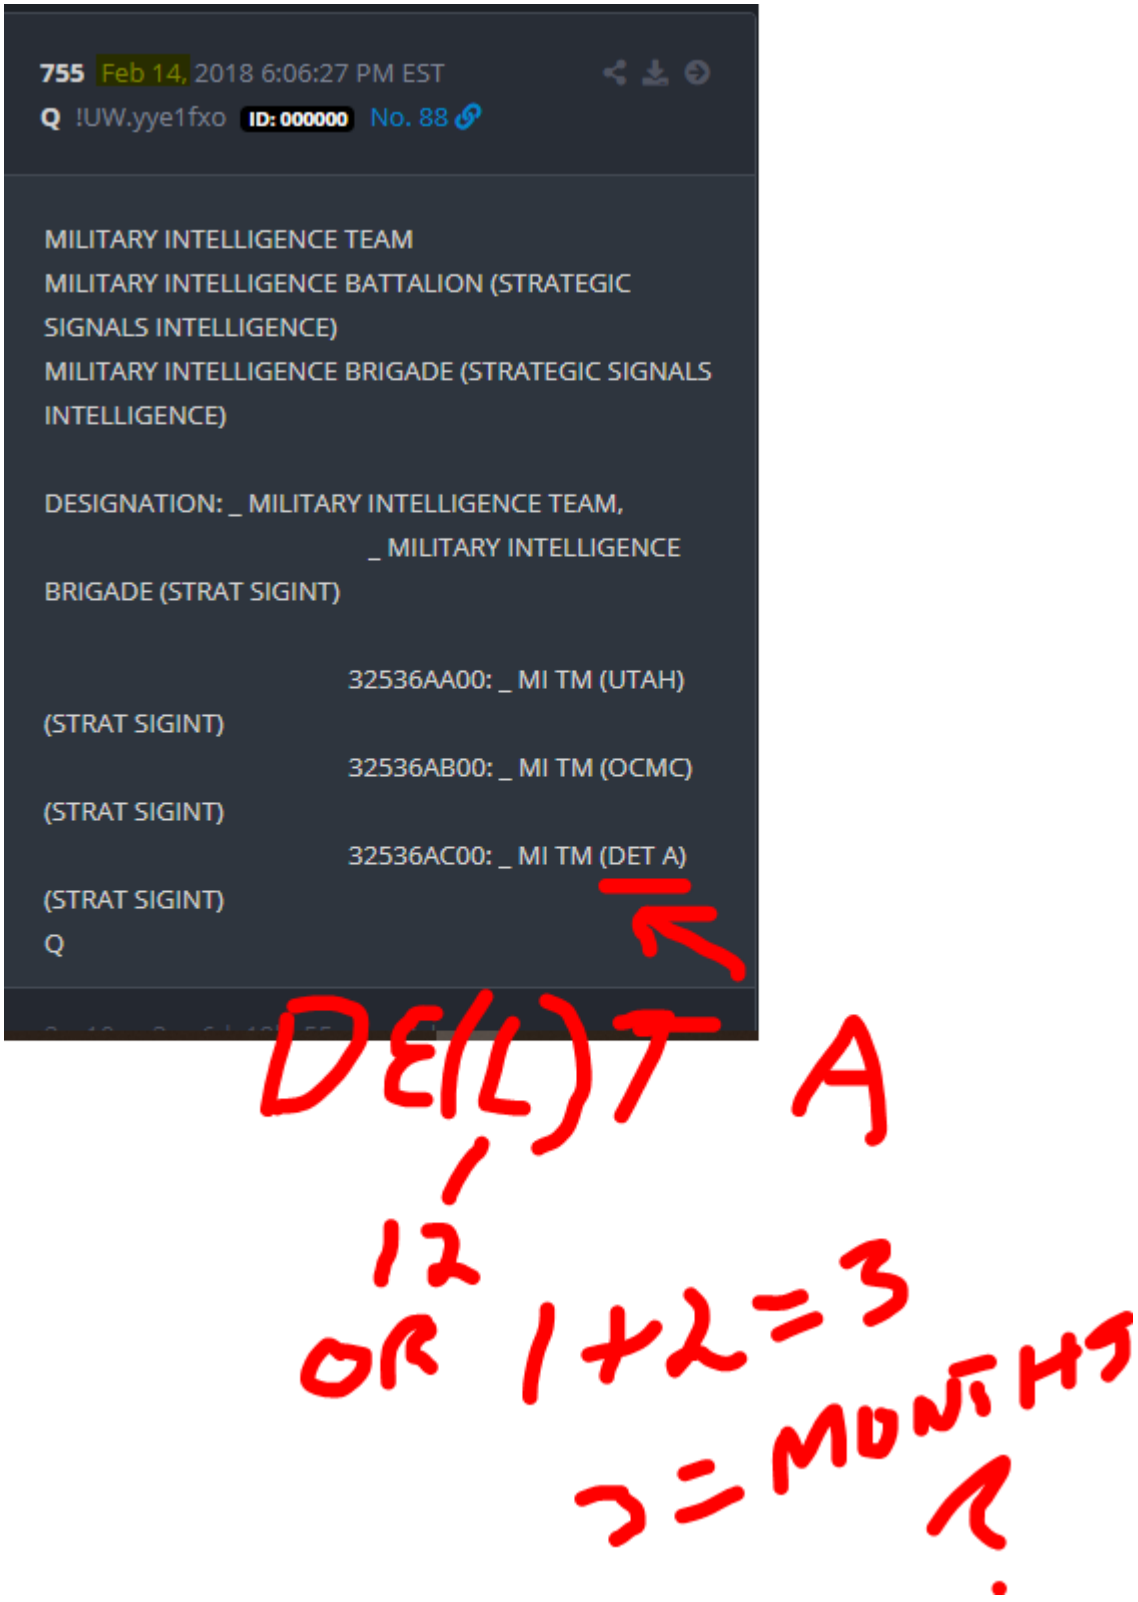

1235. Well just run across at face value. This lets you (the user) discern for themselves. I'll do my own interpertation (extra steps) after these face values.

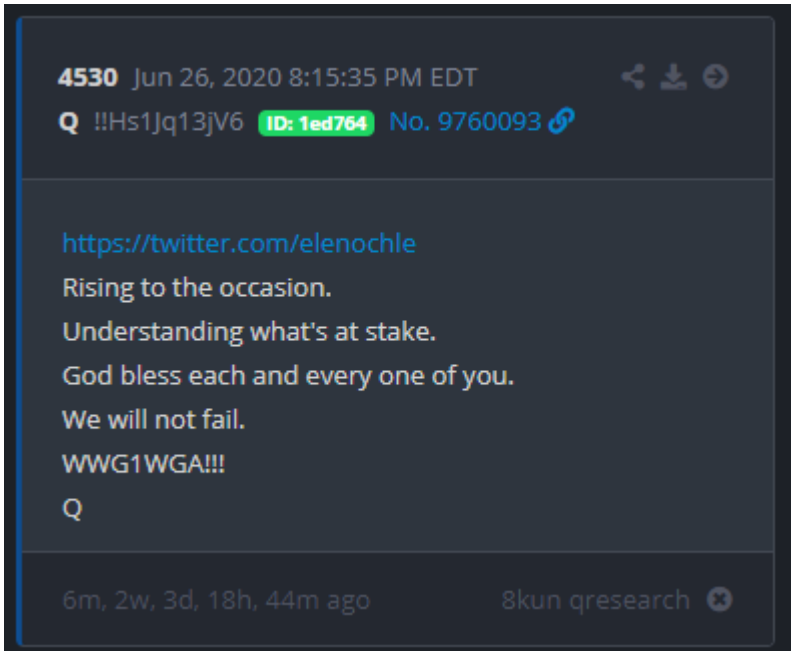

1258 (23up from our previous) is this.

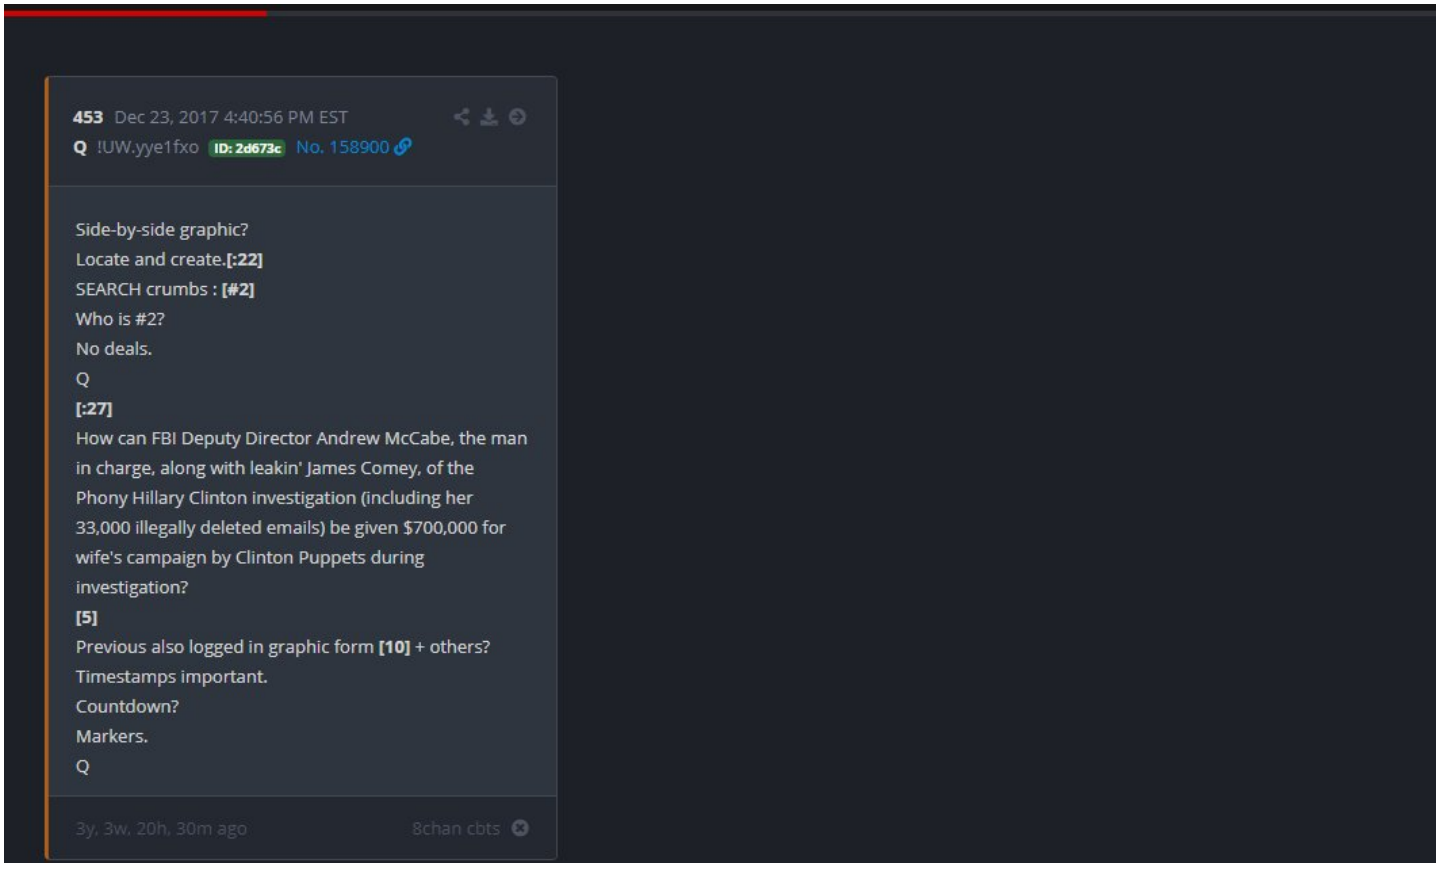

755. Just want to point out that 14th. If purposeful. These RT's are part of a plan that is in motion. Both done in the past to lead to a 14th delta (plus 3 months) Notice that L missing from the drop bottom? L=12 1,2=+3
Tried to illustrate the best I could.

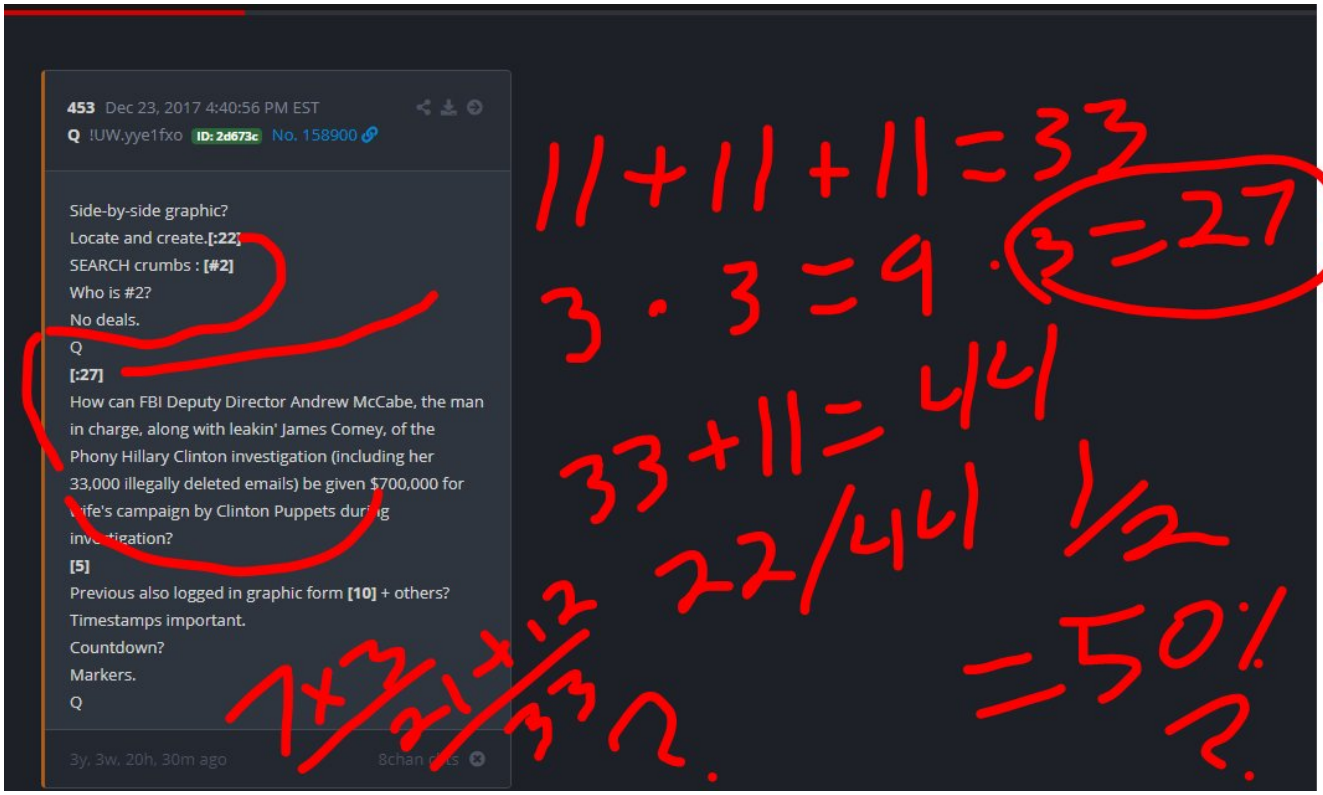

I know 453 is listed I'll do an extra to thank peeps who look at these and to those who look at the drops/boards. 453[0] just added it in. Drop is such.

Back on track 453 is such. Again this is just face value I need to get a side by side going, comparison of time stamps, that delta (possible one) might have more to it.

@ThreadReaderApp, please unroll. If anyone spots erros, go ahead and get at me. It happens sometimes! (Again I'll try to do a breakdown later) Leave this as a preview.
