I do time's inbetween tweets, take the results, translate the time variations back to the boards. I'll explain and illustrate the best I can. This is gonna be a long one. We'll use the orthodox method, then I'll illustrate another re-read using "keys"?. Here we go!

Looking at 3rd Special Forces, these two. Both of these are Rt's. One done one the 13th at 10:04am. The next one is the same thing, diff time/org. A day before 12th, at 21:29.

A Message to the Army Community About Recent Events at the U.S. Capitol

Dear Soldiers, Civilians, Family members and Soldiers for Life:

The violent riot at the Capitol building in Washington, D.C. on January 6th, 2021 was an attack on the U.S. Congress and our Constitutional democracy. Since the Nation's founding, the United States Soldiers and Civilians have committed themselves to safeguarding democratic ideals while adhering to civilian authority by swearing an oath to support and defend the Constitution. We defend the rights of every American, and we protect the roles of our institutions of democracy. We remind all Soldiers and Civilians to uphold the Army's apolitical standards.

Democratic elections are a constitutional right, and the military has no role in determining their outcome. The Nation expects all members of the United States Army to follow the law and do the right things the right way, whether we are in or out of uniform. To maintain the sacred trust of the American People, it is important that all those who represent the Army, in any capacity, remain models of professionalism, character, and integrity.

The Army is steadfast in its role to defend our Nation, and our National Guard Soldiers continue their mission to support local law enforcement security efforts. We want to thank you for your commitment to the Army values as we remain stewards of our profession during these challenging times.

So this is what the math looks like. Tools make it easier.

So 12 hours 35m is now drop 1235. Time variations as follows, 1258, 755, 453 (and 1235).

Time Calculator

This calculator can be used to "add" or "subtract" two time values. Input fields can be left blank, which will be taken as 0 by default.

Result

13 days 10 hours 04 minutes 0 seconds
- 12 days 21 hours 29 minutes 0 seconds
= 0 days 12 hours 35 minutes 0 seconds
= 0.524306 days
= 12.58333 hours
= 755 minutes
= 45,300 seconds

1235. Well just run across at face value. This lets you (the user) discern for themselves. I'll do my own interpretation (extra steps) after these face values.

1258 (23up from our previous) is this.

755. Just want to point out that 14th. If purposeful. These RT's are part of a plan that is in motion. Both done in the past to lead to a 14th delta (plus 3 months) Notice that L missing from the drop bottom? L=12 1,2=+3
Tried to illustrate the best I could.

I know 453 is listed I'll do an extra to thank peeps who look at these and to those who look at the drops/boards. 453[0] just added it in. Drop is such.

Back on track 453 is such. Again this is just face value I need to get a side by side going, comparison of time stamps, that delta (possible one) might have more to it.

@ThreadReaderApp, please unroll. If anyone spots errors, go ahead and get at me. It happens sometimes! (Again I'll try to do a breakdown later) Leave this as a preview.

How can FBI Deputy Director Andrew McCabe, the man in charge, along with leakin' James Comey, of the Phony Hillary Clinton investigation (including her 33,000 illegally deleted emails) be given \$700,000 for life's campaign by Clinton Puppets during investigation?
