HATSUN at 1000. The unseen compounder in this space. People looking at PE went with Parag & Prabhat, whereas this guy has been compounding wealth since the last couple of decades, surely should be doing something right!

Don't get shocked by looking at HATSUN.

The stock has gome Ex-Bonus, you get 1 share for every 3 shares held. Stock is up 10% today after bonus.

Massive wealth creation happening.

Don't be surprised to see it trading above 1000 even after bonus. https://t.co/ztXMGyTdwh
