## “Belief” is NOT a Medical Counter Measure

## Through April 2020, the official recommendation by the Journal of the American Medical Association was unambiguous.

## “Face masks should not be worn by healthy individuals to protect themselves from acquiring respiratory infection...

...because there is no evidence to suggest that face masks worn by healthy individuals are effective in preventing people from becoming ill.”

In contravention to established science, States, municipalities and businesses have violated the legal requirements for the promulgation of medical counter measures during a public health emergency stating a “belief” that face masks limit...

...the spread of SARS CoV-2. To date, not a single study has confirmed that a mask prevented the transmission of, or the infection by SARS CoV-2.

All parties mandating the use of facemasks are not only willfully ignoring established science but are engaging in what amounts...

...to a whole population clinical trial. This conclusion is reached by the fact that facemask use and COVID-19 incidence are being reported in scientific opinion pieces promoted by the United States Centers for Disease Control and Prevention and others.

All of these laws have been broken. All relevant authorities in the United States must cease and desist the use of face masks until the matters above are rectified.
