@slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE All the clinical Neuropsychological and forensic testing manuals that match the clinical measures we use...
Then made cheat sheets. (ok geek comment alert) the reason to do this is because if you don't understand the base rates and how they were derived, the populations 1/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE sampled to gain those "norms" and the year in which this was done, your interpretation of testing data will be significantly "off". If you can't assess the accurate diagnosis (meaning you misdiagnose) you end up causing pain and suffering not to mention treatment especially 2/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE if it involves psychopharm (meds)doesn't treat what actually ails the patient. When this happens, at best no one's treated for the actual illness they have which causes undue pain & suffering, at worst symptoms are exacerbated and or meds cause adverse reactions that can 3/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE have lasting effects (more pain and suffering) not to mention totally messing with the outcomes of legal cases
In short an inaccurate Diagnosis totally messed with people's lives.
. ..... So, if I use a measure you can bet Ive read the manual and understand the cautions, and 4/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE when to augment via clinical judgement. That often puts me at odds with folks in terms of opinions but I can back it all up via research and what's written in the manuals which often have caveats re use and application that people miss. More, as I went along it became obvious 5/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE that alot of research improperly uses measures which also helped me when deciding what research was in fact accurate vs results that verified hypothesis because of research design flaws..all of which typically starts with how they arrived at the raw data to begin with, which 6/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE was later weighted and analyzed via stats to determine results. It also told me which measures were generally valid vs perhaps older tests that likely didn't measure what was assumed or that results were prone to being skewed. Equally this applied to evaluating newer measures 7/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE for validity. Newer is not necessarily better. For instance many tests were not normed for Veterans deployed 2-3-4 times to combat zones or veterans period. Most of the "diversity" norms tell you that testing isn't normed of that population but on majority 8/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE White population (in terms of validity meaning the test actually measures what it says it does) and THEN using subset samples is normed for say "Af-Am" but those norms are in comparison to WP norms....the problem here is that while that measure may accurately assess an 9/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE ability for WP it MAY NOT ACTUALLY MEASURE THAT ABILITY or assess symptoms for Af-Am..as wording hermeneutics and Cultural references ARE NOT THE SAME and can not just be assumed because they accurately measured such for WP. This gives me pause quite often. Again a total geek 9/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE (whoops that was 10/)
rant and probably way more info than anyone needed or wanted but the focused remains on accurate diagnostics. I'm a systems thinker. What that means is I have to understand THE WHOLE to understand the parts. I was always reading way beyond what 11/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever

@mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE was covered because US education focuses on rote learning of piecemeal information and typically comes without a broader or systems context. To integrate what I'm learning I have to do more. While this might seem like painful overkill in the immediate and making things "more 12/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE complex than they need to be", over the long-term, the perks are worth it because LIFE IS COMPLEX and from my POV to do anything well requires careful consideration and an accurate grasp of the embedded complexities.
13/

@KathyGrants @slomoshun1966 @kk131066 @foe_us @nature_org @jane__eden @impakterdotcom @sillymickel @vegix @how_sustainable @JamesrossrJames @climatemessages @sustainableuni1 @LolaGayleC @ResisterForever @mmpadellan @AdamParkhomenko @glennkirschner2 @morethanmySLE As for a Bat signal.... I'll have to ask @ashkenaz89 to think up one...she's really good at that.
