Hindcopper -- Can face selling pressure from 122-125 zone. Bull are weak and Previous bottoms 135-136 major hurdle. Not Crossing 125/135 can take stock to lower levels

1. Given sell at 170-175 zone when it made a distribution pattern for targets 120 and 95
2. Stock is heading towards 90-95 and wont be suprised to see 75-80 levels in panic
3. Stock is clearly in down trend and till we see a turn around I would like to wait and watch
