The 1918 -1919 pandemic originated most likely in Kansas, USA. Early March 1918 an outbreak of an unknown illness was recorded in fort Riley, Funston, Kansas. Remember the place and the time.

By late spring/ early summer the illness has spread but was generally mild and almost unnoticed by the public. The US had mobilized troops to join WWI in Europe and a lot of illness spread to a lot of places. For the USA the mortality curve looks something like this

It was the second peak in October that was much more deadly than the first one. An interesting theory is, this was caused by a drug from #Bayer. In 1918 it was heavily advertised and the US Surgeon General recommended a regime of aspirin on 9/15, repeated by the American medical

association on 10/5, for a dosis that we now know is toxic. #Salicylate poisoning is well documented to lead to pulmonary edema and decreased O2 in the blood. The lungs become vulnerable to bacterial pneumonia. #Asperin sales more than doubled in 1918. <https://t.co/vli0LXOuuK>

Let's jump to the study performed in 2008, where our well known Dr #Fauci (CDC,USA and formed head of Covid19 taskforce) was one of the co-authors. They examined autopsy reports, pathological and bacteriological data and concluded the vast majority <https://t.co/PczTAHVfMY>

(>92%) died of #bacterialpneumonia. They state that in later flu epidemics, the same is valid. This seems like very important information in #Covid19 times, where millions wear their bacteria infested cloth masks many hours a day. Why didn't Fauci mention this once during his

daily press conferences? You wonder. What did trigger the outbreak in the military camps like FUnston remains a mystery. But let me tell you about a completely unrelated event that happened at the exact same time and place. The military started testing new experimental

meningococcus vaccines, containing different strains and doses, in horse serum. The vaccines were prepared and provided by our good old friends from the #Rockefeller Institute. A lot of soldiers were vaccinated and shipped overseas. The Rockerfellers <https://t.co/XVzH9jYoFA>

delivered their vaxx to several European countries so they could also use their soldiers that weren't slaughtered on the battle field as guinea pigs. But as I said, this has according to reliable MSM sources absolutely nothing to do with is.

As for Fauci....Seems to me that first he went to study it, to then try and replicate it. Same MO, same 'waves', same measures (masks, social distancing, lockdowns), same pharmaceuticals and vaccines, same criminals...#OperationWarpSpeed
