THE RISE OF KHALISTANI SLOGANS

In 1980's and early 90's, The demand of Khalistan in Punjab was at peak. B/w 1979 - 1989, 5000 civilians were killed in Punjab by Pro Khalistani Terrorists. In 1990 - 1991, more than 5,058 civilians and hundreds of police personnel were killed.

This was the worst period of voilence in Punjab, Militants and Pakistanis were claiming that Punjab had liberated zones. These zones existed in the regions of Punjab called "MAJHA", which was the worst effected district of Punjab.

On 30 September 1990, around 200 Pro Khalistani Militants attacked BALWINDER SINGH SANDHU'S house and the security provided by State Government ran out of fear. Undaunted, the Sandhu brothers and their wives fought the terrorists with their pistols and sten guns

provided by the Government. The resistance shown by the Sandhu brothers and their family members forced the terrorists to retreat.
Family has displayed courage and bravery of a high order in facing the attack of the terrorists and foiling their repeated murderous attempts.

Mr. BALWINDER SINGH SANDHU & Mr. RANJIT SINGH SANDHU along with their wives Mrs. JAGDISH KAUR & Mrs. BALRAJ KAUR was attacked around 20 times in between 1988 - 1991.

They were awarded the SAURYA CHAKRA in 1993 for their armed struggle against militancy in Punjab (Pro Khalistani Terrorism) through the 80's and early 90s. The civilian family has been on the hit list of militants ever since.

On 16 October, 2020; BALWINDER SINGH SANDHU was shot dead by two motorcycle - brone unidentified assailants at his residence in Bhikhiwind, Tarn Taran, Punjab.

Sandhu’s family alleged that his security had been withdrawn earlier this year and they had been constantly trying to get in touch with Punjab Director General of Police (DGP) Dinkar Gupta to redeploy the police with them.

Only one person had been attached to him who too remained absent for weeks. (As per statement given by Widow JAGDISH KAUR)

Family of BALWINDER SINGH believes that he was killed by Khalistani militants as he was the one who fought against them even managed to put a stop on Pro Khakistani activities in Punjab.

Where as, the Police connected the assainiation with personal enmity and with his son who is an office bearer in the Student's body of Khalsa College in Amritsar and Police are also looking it as a result of students politics. Other possibilites are also looked out.

However, Police has arrested 16 accused yet. On 8 December, 2020; Special Cell of Delhi Police said that he was assassinated for being vocal against terrorism and extremism. His death was an "ACT OF TERROR".

The probe suggests that the two arrested assassins, Gurjit Singh alias Bhaa and Sukhdeep Singh alias Bhura, were roped in by Dubai-based gangster Sukhmeet Pal Singh alias Sukh Bhikhariwal through gangsters Ravinder Singh alias Gyani and Sukhraj Sukka, who are lodged in Ferozepur.

Bhikhariwal was asked by ISI to kill Sandhu as he became a soft target after his security cover was removed by the state government a few months ago.

Now, The CM Mr. Amrinder Singh is supporting #FarmersProtest where we can hear Pro - Khalistani Slogans and several banners are also at display demanding division of India.

Journalist Seema Mustafa called Aroosa Alam (alleged ISI Agent) a former Journalist as the FIRST LADY OF PUNJAB. Writer Sobhaa De called Aroosa Alam as Amrinder Singh's live - in - partner.

Aroosa met Captain Amarinder Singh in 2004 when he visited Pakistan. A former journalist, Aroosa is the daughter of Akleen Akhtar, a socialite who influenced Pakistan's polity in 1970s. Aroosa's mother was considered very close to the military establishment.

Aroosa Alam inherited her mother's network. When she became a journalist, she chose reporting on the military where she had an inside view.

Now you may easily connect dots. The #Farmersprotest in India is fuelled by Pro - Khalistani Militants and ISI along with the help of CCP.

Disclaimer:- I rest my case here. These all are my research. I am not putting allegations on anyone. I just wrote what I have observed. I collected the data and informations through several news articles, news videos and some of my perceptions.
