Maps of the Island of California:

> Could this be where we get the legend of California as an Island?
>
> Being yet another mythical island nation that turned out to not be what we thought it was.

Hubbards hope
Mr Thomas Button wintred in 57 deg. and found the tide constantly every 12 howers to rise 15 foote or more, and that a west winde did make the nepe tides equal to ye springe tydes. And ye sumer solstice about ye latitude of 60 degrees he founde a stronge race of a tide running sometymes eastwarde, sometymes westwards, wherevpon Iohan Hubbarde in his plate called ye place Hubbarts hope.
In the Bottome of Hudsons bay where he wintred ye height of the tyde was but two foote, and in the bottome of Fretum Davis was found by Mr Baffin to be but one foote, whens by the nearenes of the South sea in Porte Nelson, it was constantly 15 foote or more.
Nelson
