This was written by Beethoven, in 1830 (111 - God's Creation) and it goes for 5:55 (15 - God's Grace) to capture the Moonlight on Lake Lucerne in Switzerland.

It was written in the 19th century and was extremely innovative for its time - 19: Spiritual awakening and growth.
■

Lake Lucerne is exquisitely beautiful (I haven't been there yet) but called to me a lot as a child). This music God was just showing me was capturing the energy of the ancient portals that connect the grid to the stars and underground worlds (just saw this in a vision). ■

A little search to show me this demonstrated that there are over 20,000 underground bunkers dotted around those lakes, and that go to these deep underground tunnels. And that this is one of the places where children were held captive.

A quick reference to Gematria follows:

Switzerland is the playground of the Illuminati, and was one of their playgrounds. Here, we find a convergence of worlds, where CERN is found not far, and that this is a portal for receiving demonic transmissions (I saw this in a vision before I looked at the results)

Is this one of the places where the ET humanoids are found? hmmm ■

https://t.co/XM0qXurOof

Switzerland has a powerful Masonic ritual connection 33

and there's tunnels here that reach to Antarctica

These are places where Mind control techniques are conducted

and is considered one of the Elite 4 "corners" of the Earth

Gematria confirms this is a demonic military complext

in some kind of alternate reality

Don't cry for the "Christians" that created these problems

We are on a countdown to Judgement Day

Elijah has taken on his Chariot of Fire, and is on the way

But we should have no fear - for blessed are the pure in Heart.
