#ICICIBANK low made 670 and now 800.

Channel reversals are the best price points to buy a stock or add more.

We saw this in #SBIN as well ■<https://t.co/EATq54Pgbw>

These stocks have a long way to go! <https://t.co/wUyJUqUIUE>

#FnOstock #SBIN has completed a 9 month time correction towards the primary trend line & is all set to head higher from here.

This could also be a **#SIP** stock considering it broke out from a decade long consolidation in Feb'21.

Might continue to outperform **#Nifty** & **#Banknifty** pic.twitter.com/mYk4exvOn7
