#IGL -557

Likely move higher towards 630

#Probability

#IGL -544.80

Fibonacci extension shown in chart.

Now above 6.857%(402) which likely act as support. If price quickly move towards 630 and cross than huge upside open 999-1571-2594-3872.

If fall below 402. Than its part of overall correction.
