Chola dynasty has been the longest ruling dynasty of the world. They ruled from 3rd century BCE to nearly 13th century CE. They ruled south east Asia including Indonesia and even Philippines and Maldives.

@LostTemple7 Rajendra Chola I (1012-1044)
a great ruler of our history who was involved in the conspiracies of leftist historians..

Rajendra Chola was the greatest ruler of the Chola dynasty, he expanded the Chola empire by his victories and made it the most powerful empire of South India.

@LostTemple7 Rajendra Chola was the only king who not only waved his conquests to other places but spread a wonderful system of architecture and administration to the places where he ruled!

In 1017 AD, this powerful hero of ours had defeated the mighty King Mahendra V of Sinhala (Sri Lanka)

@LostTemple7 and captured the entire Sinhala (Sri Lanka).!

While many great kings could not dare to advance with their army by reaching the mouth of the rivers, Rajendra Chola formed a powerful navy with the help of easily crossing every huge river that came in his way..

@LostTemple7 Due to this navy, Rajendra Chola also established his authority on the island named Sadimantiq in the Arabian Sea. Even with the help of his deadly warships, Rajendra I had captured Java, Sumatra and Maldives by destroying the army of many kings..!

@LostTemple7 After establishing his empire on a vast territory, he (Gangai Koda) built a new capital called Cholapuram, where he built a huge artificial lake which was sixteen miles long and three miles wide. This lake is considered one of the largest man-made lakes in the history of India.

@LostTemple7 Ganga water was brought from Bengal in that lake..!

On the one hand, despite the severe famine during the reign of Shah Jahan in Agra, historians continued to fill the pages of history in his praise, on the other hand, the history of Rajendra Chola under which South India

@LostTemple7 was representing prosperity and glory in Asia. The books were silenced under a conspiracy ……!

Even the Bay of Bengal, which is the largest bay in the world, its ancient name was Chola Lake, it continued to convey the greatness of Chola under its name, later it was changed

@LostTemple7 to Kalinga Sea and then Bengal was replaced by the British. Converted into the Bay of Bengal, left historians always conspired to destroy the history of our heroes and taught about the Mughal invaders who destroyed our temples and culture, including some women on the post

@LostTemple7 of commander in Rajendra Chola's army.Centuries later,there was a time of the Mughals when women went behind the scenes
Historians never told us that there was a king who had women commanders in his army&who with the help of his powerful boats/navy,took over all of Southeast Asia
