Rudrapatnam Shamashastry – The #Mahamahopadyaya who discovered Chanakya's Arthashastra.

On his Jayanti a tribute to the legendary #Kannadiga who proved Bharatiya Civilization had robust Ancient Political & Economic policy & not copied from Greek as Europeans claimed.

Let us

begin His-tory whose Literary Works gives Goosebumps to every Bharatiya.

R Shamashastry's modern translation of Arthashastra is a prescribed text at Harvard, Yale and Oxford for students of Political Science, International Relations and Economics today.

Until this discovery, the

the Arthashastra was known only through references to it in works, including those by Dandin, Bana, Vishnusarma, Mallinathasuri, Megasthenes, as well as others. This discovery was "an epoch-making event in the history of the study of ancient Indian polity".

It altered the

perception of Ancient Bharath and changed the course of history studies, notably the false belief of European scholars at the time that Indians learnt the art of administration from the Greeks.

Shamasastry received a Ph.D Citation from Oriental University of Washington in 1919

and the Campbell Memorial Gold Medal from the Royal Asiatic Society, Mumbai Chapter, in 1921. Krishna Raja Wadiyar IV conferred on him the title "Arthashastra Visharada" in 1926 while the Viceroy and the Governor General of India conferred the title "Mahamahopadyaya" in 1930.

S A N A D

To

Doctor Rudrapatna Shama Sastri,
B.A., Ph.D.,

Director of Archaeological Researches (Retired),
Mysore.

I hereby confer upon you the title of
Mahamahopadhyaya as a personal distinction.

Min

Viceroy and Governor General
of India.

Simla,

The 3rd June 1930.

Bharatha Dharma Mahamandali (Varanasi) conferred the titles “Vidyalankara” in 1924 and “Panditaraja” in 1935.

An often-told anecdote involves the visit of the then-king of Mysore, Krishna Raja Wadiyar IV, to Germany. When introduced as the king of Mysore, he was asked by the

vice-chancellor of a German university whether he was from the Mysore of Shamasastri. On his return, the king honoured Shamasastri and said "In Mysore we are the Maharaja and you are our subject, but in Germany, you are the master and people recognise us by your name and fame."

Gifting MKG, a copy of “Arthashastra” during their meeting at Nandi Hills in 1927, he told Gandhi, “Self-sacrifice was a dictum for ancient Hindus. Now also if cultured centres like ancient viharas come up, everything will be alright. Ashoka had Upagupta, Pushyamitra had

Patanjali, Kumarapala had Hemachandra and Kings of Vijayanagar had Vidyaranya. Now, we too want an army of highly cultured, selfless, educated men to proclaim the ideal of self-sacrifice wherever we go. We too will then acquire lasting peace and happiness through it” to which

Gandhi quipped: “But, who is to bell the cat, Mr. Sastry?” Gandhi’s double standards exposed again and again.

Born on 12th January 1868 at Basavapatna, to parents Venkataramaiah and Puttamma, at the age of 13, he came to Mysuru to study under Pt. Kallikote Sastry. He later

joined Maharaja Sanskrit Patashala to pursue vidwat course and graduated in 1891.

The then Dewan K. Seshadri Iyer became a patron to R. Shamasastri and provided accommodation and food to the budding scholar. His only duty was to read scriptures to the Dewan’s mother. He was sent

to Central College, Bengaluru, to study English, Sanskrit & Physics at the undergraduate level. He obtained a B. A. degree with distinction from Madras University in 1899. On recommendation of the Dewan, he was appointed as a Librarian at the Oriental Library (Oriental Research

Institute), Mysuru, in charge of editing their publications.

During this period, Shamasastri was requested to catalogue the rare manuscripts and palm leaf texts of the Library. Many years ago, a Tanjore Pandit had gifted a rare palm leaf text to the Library. Till then, scholars

had assumed that the great treatise on economics and politics “Arthashastra” written by Kautilya as being lost. Shamasastri discovered this rare text in a nook of the Library with commentary by Bhatta Swamy. It electrified the world of scholars and “Shamasastri & Mysuru” became

who discovered the lost treatise Arthashastra!

Mahamahopadyaya Rudrapatna Shamasastri was an extraordinary scholar who brought international fame to the city of Mysuru. He was born on 12th January 1868 at Basavapatna, to parents Venkataramaiah and Puttamma. At the age of 13, he came to Mysuru to study under Pt. Kallikote Sastry. He later joined Maharaja Sanskrit Patashala to pursue vidwat course and graduated in 1891.

The then Dewan K. Seshadri Iyer became a patron to R. Shamasastri and provided accommodation and food to the budding scholar. His only duty was to read scriptures to the Dewan's mother. He was sent to Central College, Bengaluru, to study English, Sanskrit and Physics at the undergraduate level. He obtained a B.A. degree with distinction from Madras University in 1899. On recommendation of the Dewan, he was appointed as a Librarian at the Oriental Library (Oriental Research Institute), Mysuru, in charge of editing their publications. While here, he wrote such scholarly articles as "Devanagari Alphabet" (1905) and "Gavam Ayama" (1908).

During this period, Shamasastri was requested to catalogue the rare manuscripts and palm leaf texts of the Library. Many years ago, a Tanjore Pandit had gifted a rare palm leaf text to the Library. Till then, scholars had assumed that the great treatise on economics and politics "Arthashastra" written by Kautilya as being lost. Shamasastri discovered this rare text in a nook of the Library with commentary by Bhatta Swamy. It electrified the world of scholars and "Shamasastri & Mysuru" became famous overnight. So much so, that Nalwadi Krishna Raja Wadiyar, during his trip to Germany, was introduced as the Maharaja hailing from Shamasastri's hometown of Mysuru, where Arthashastra was discovered!

Shamasastri was unable to decipher the script even after three months of its discovery. One night, in his dream, the key to the text was revealed. He could later read the Granthi

The Oriental Research Institute (ORI) in Mysuru.

Many years ago, a Tanjore Pandit had gifted a rare palm leaf text to the Oriental Library. Till then, scholars had assumed that the great treatise on economics and politics "Arthashastra" written by Kautilya as being lost. Shamasastri discovered this rare text in a nook of the Library with commentary by Bhatta Swamy. It electrified the world of scholars and "Shamasastri & Mysuru" became famous overnight. So much so, that Krishna Raja Wadiyar IV, during his trip to Germany, was introduced as the Maharaja hailing from Shamasastri's hometown of Mysuru, where Arthashastra was discovered!

Mahamahopadyaya Rudrapatna Shamasastri

Script and translate it. The full text was published in 1915 with an introduction by Dr. Fleet, the renowned Indologist. His introduction heralded to the world the discovery and translation of such a magnificent piece of work (presumed lost hitherto) and credited Shamasastri for having accomplished such a grand endeavour. Though there are numerous translations of the Arthashastra since then, it is Shamasastri who deserves laurels for bringing it to the public notice to begin with.

Shamasastri gifted Gandhiji a copy of "Arthashastra" during their meeting at Nandi Hills. He told the Mahatma, "Self-sacrifice was a dictum for ancient Hindus. Now also if cultured centres like ancient viharas come up, everything will be alright. Ashoka had Upagupta, Pushyamitra

had Patanjali, Kumarapala had Hemachandra and Kings of Vijayanagar had Vidyaranya. Now, we too want an army of highly cultured, selfless, educated men to proclaim the ideal of self-sacrifice wherever we go. We too will then acquire lasting peace and happiness through it" to which Gandhiji quipped: "But, who is to bell the cat, Mr. Sastry?"

In 1906, he co-edited "Taithtiriya Pratishakhyas" along with Sri Kasturi Rangacharya. In 1909, he published translations of nineteen other Sanskrit works and nine ancient Kannada works. These endeavours were greatly aided by contemporary scholars like A. R. Krishnasastri, T. N. Subbarayasastri and V. Shyamacharya. Shamasastri held the post of Principal of Chamaraja Sanskrit College at Bengaluru from 1912

to 1918. He served as the curator of Oriental Library, Mysuru, in 1918. From 1922, Shamasastri was Director of Archaeology Department in Mysuru for seven years. He oversaw restoration of temples at Halebeedu and Belur. He made important contributions in the field of Epigraphy and Numismatics. From 1925 onwards, the annual reports of the Archaeology Department also carried the Kannada version of the Inscription. He established an Archaeology Museum in the Princely State of Mysuru.

Shamasastri received a Ph.D Citation from Oriental University of Washington in 1919 and the Campbell Memorial Gold Medal from the Royal Asiatic Society, Mumbai Chapter, in 1921. Krishna Raja Wadiyar IV conferred on him the title "Arthashastra Visharada" in 1926 while the Viceroy and the Governor General of India conferred the title "Mahamahopadyaya" in 1930. Bharatha Dharma Mahamandali (Varanasi) conferred the titles "Vidyalkara" in 1924 and "Panditaraja" in 1935.

Sastry authored seven books and contributed 100 articles in various journals. Some of his popular books include "Vedangajyotisa" (1936), "Drapsa: Vedic Cycle of Eclipses" (1938) and "Evolution of Indian Polity" (1919) among many others. His felicitation volume had contributions from eminent persons like R. K. Mookerjee, Kuppuswamy Sastry, M. Winternitz, P. V. Kane, Jha, Ashutosh Mukherjee, D. R. Bhandarkar and C. R. Reddy. His correspondences with his network of contacts included the likes of Rabindranath Tagore, B. N. Seal, A. Venkatasubbiah, B. A. Saletore, S. M. Godrej, L. D. Barnett, Stein Konow, A. B. Keith and Sir Richard Temple.

Upon invitation from the then VC of Calcutta University Sir Asutosh Mookerjee, Sastry delivered 10 lectures on "Evolution of the Indian Polity." These were later brought forth as a book in 1920. Calcutta University honoured Shamasastri with an honorary doctorate in the same year. The modern translation of Arthashastra is a prescribed text at Harvard, Yale and Oxford for students of Political Science, International Relations and Economics today.

Sastry named his house in Mysuru as "Asutosh" (abode of contentment) and spent his last years here. He lived till the age of 77 years and breathed his last on 23rd January 1944. With his passing away, a glorious and remarkable chapter in the history of traditional scholars of Mysuru came to an end. A flood of condolence letters made their way to "Asutosh" from across the world.

It is sincerely hoped that Rudrapatna Mahamahopadyaya Arthashastra-Visharada Vidyalkara Panditaraja Shamasastri's erudition, scholarship and command over languages will be emulated by present day scholars and students.

famous overnight.

Shamasastri was unable to decipher the script even after three months of its discovery. One night, in his dream, the key to the text was revealed. He could later read the Granthi Script and translate it. He transcribed, edited and published the Sanskrit edition

in 1909. He proceeded to translate it into English, publishing it in 1915 with an introduction by Dr. Fleet, the renowned Indologist. His introduction heralded to the world the discovery and translation of such a magnificent piece of work (presumed lost hitherto) and credited

Shamasastri for having accomplished such a grand endeavour. Though there are numerous translations of the Arthashastra since then, it is Shamasastri who deserves laurels for bringing it to the public notice to begin with.

Apart from discovering Kautilya's Arthashastra, Sastry

authored seven books and contributed 100 articles in various journals, he pursued his research in the Vedic era and Vedic astronomy, making valuable contributions to Vedic studies. The following are among Shamasastri's works:

1. Vedangajyautishya – A Vedic Manual of Astronomy,

8 BCE

2. Drapsa: The Vedic Cycle of Eclipses – a key to unlock the treasures of the Vedas.

3. Eclipse-Cult in the Vedas, Bible, and Koran – A supplement to the Drapsa. It is this Cult that has given rise to epic and puranic tales in India. The mathematical aspect of eclipse-cycles

is treated at great length and eclipse-tables have been appended. Dr. E. Abegg, Professor, University of Zurich, Switzerland, stated- 'I see with admiration that R Shamasastri, a thorough scholar in the difficult problems of Vedic Astronomy and Calendar, things of which European

Indologists have very rarely a true Knowledge'

4. Gavam Ayana- The Vedic Era- is an exposition of a forgotten sacrificial calendar of the Vedic poets and includes an account of the origin of the Yugas.

5. Evolution of Indian Polity. This book is a compilation of Ten lectures

delivered in Calcutta University. Sir Asutosh Mookerjee, Vice-chancellor of Calcutta University, personally invited Sastry to deliver these discourses. In this work, the ancient Indian administrative systems and various levels of administrative set-up are critically examined, on

Upon invitation from the then VC of Calcutta University Sir Asutosh Mookerjee, Sastry delivered 10 lectures on “Evolution of the Indian Polity.” These were later

brought forth as a book in 1920. Calcutta University honoured Shamasastri with an honorary doctorate in the same year.

Shamashastry had such high regards towards Mookerjee that Sastry named his house in Mysuru as “Asutosh” and spent his last years here. He lived till the age of 77 years and breathed his last on 23rd January 1944. With his passing away, a glorious and remarkable chapter in the

history of traditional scholars of Mysuru came to an end. A flood of condolence letters made their way to “Asutosh” from across the world.

and command over languages will be emulated by present day scholars and students.
