“How do you get so much done within a short amount of time?”

It’s a 2 part strategy

Every week follows a set of certain themed posts
Artificial Intelligence to create high quality content + designs in minutes

Part 1:

Monday:
Aesthetic Post (High Quality Image)

Tuesday:
Video

Wednesday:
User Generated Content (UGC)

Thursday:
Aesthetic Post (these ones always pop off)

Friday:
Fact Friday

Saturday:
Aesthetic Post

Sunday:
Did You Know Post (shorter version of fact Friday post)

This is efficient content curation

You now have a schedule to help you visualize what type of posts to be doing on each individual day

You're probably wondering what the aesthetic posts are.

Simply put, they're nice images of things like gardens, sunsets or images that would relate to the niche.

Aesthetic posts often do the best & are more likely to be noticed.. (found from photography accounts)

"So, what about the design? How are those made quickly?"
