Who are some of the Best and worst TTs out there...who are running their trains well....share your experience for others.
MF, PMS, AIF , advisory etc.

> Every train(strategy) has limited seats for its passengers to enjoy the journey (performance) unless the TT (fund manager) decides to cash in as many tickets as he can and is apathetic towards reduction of the performance like our most popular mutual fund (U know which) !!\U0001f920 pic.twitter.com/febeE3YeeZ
