#Investing clues

Read that the running cost of an EV Scooter for 100 KMs is just Rs 10-12 (2 units of power). While that for ICE Scooter/Bike it is Rs 200 (2 litres of Petrol).

Are there any component manufacturers supplying specifically for the EV functionality ?

Friends ■■

As this thread on the EV Scooters is showing a lot of interest

Here is an interesting 24 min discussion with the MD of Hero electric, about the cost economics, running costs and competitive nature etc of an EV Scooter
