irctc

approching upper trendline , might took a small pause or need to break resistance with good volumes

target was 2900 , made high 2897 , with just 3 points short.

booking some positions as reached near resistance , will add near supportive trendline,

holding rest for 3600 <https://t.co/2H0myGPgu5>

ltctc

Entered 2800 \u2705

Heading towards 2900 target

Then 3600
