The channel formation is still unhindered. A beautiful price pattern at work in ITC. For investors, the best way is to add when the price comes near the lower boundary. <https://t.co/2Nw9fLQPsm>

ITC - how beautifully the price patterns work. All of a sudden an increased momentum right from the support of the channel boundary. Has a minor resistance to nail down in the middle.

Anyone observing it would have gone aggressive at lower end for a swing move pic.twitter.com/YqxkdFIJXQ
