**Saw a few posts where #LaurusLabs is being floated as 100x candidate from here.**

**That would mean it would need a market cap of 35 lakh crore+ (\$466 Billion) to achieve that goal.**

**Not going to happen.**

**Most optimistic goal is a 3 lakh cr market cap (\$40 Billion) in next 10 yrs.**

Don't fall for accounts selling you false hope  
Apply some common sense

Folks who bought Laurus at its lowest of Rs 52 per share may (Big May) see a 100 bagger, entering now will not

Laurus is my largest position, so this is not a criticism, just setting realistic expectations
