High volumes could have been better here although I am content with the move from the March lows considering the least risk the setup provided. It is better if we get a strong candle closing above the boundary.

Post the capitulation move, I am anticipating an ascending triangle breakout in Jubilant Foodworks however the buy is not triggered yet. That target open would be 667.

Ascending triangles also act as key reversal patterns. https://t.co/M1vLYEsngf pic.twitter.com/f06rbJhLaq
