Haters are gonna hate, but IMO, this is the best opportunity to start pyramiding and make it a well sized holding.

A trio of patterns coming together, has one of the highest success rate!

Double Top Buy, T20 Pattern - Bullish & Super pattern - Bullish above 477.81!

There was no entry in Oct as the stock didn't close above 340.

Don't chase & don't buy it for short term.

Now, DTB above 348.15 daily close (Now trading at similar levels).

Wait for close above it or check if it's above the trigger price after 15:20 and enter. https://t.co/vh5hZpjJER pic.twitter.com/EprcgeLSqb
