■■■ Antrim audit protective order hearing live now:

The judge just clarified that they will pause the hearing if YouTube goes down... due to the importance of transparency for the public

Deperno basically saying that the public's interest, needing election transparency and confidence, is greater than Dominion's interest in retaining privacy.

Deperno clarifying they don't plan to release any source code or reverse engineer the software

Deperno: at a minimum we need to be able to release this information to the Michigan legislature, oversight committee and... law enforcement. Wow

Ugh! This guy is saying that Deperno disclosed contents of the report in interviews... that's a lie!

Asst AG trying to block page 18, 20, 21

Of the report

Deperno offering to redact the "code"

They are going to release it! With redactions

Everyone is allowed to discuss the contents.

Deperno asking for clarifications on needed redactions

Deperno asking for a ruling on a graphic on page 18

Contending this is already public from the owners manual.

Asset AG claiming he hasn't had enough time to review so is asking for heavy redactions because "he can't be sure"

Judge says no redaction on page 18.

Apparently both parties have to agree on the redactions before release, hopefully that happens quickly

Video is now removed. Not sure why.
