A Warning:

The 'Freeports' in at least 10 locations in Britain will evolve into Charter Cities with their own laws. They will NOT be legally bound to ANY of the trade agreements between the UK and EU or any other country. They will be used to bypass all International scrutiny

'Sovereign UK' makes deal with Charter city (physically but NOT legally part of the UK) which then trades to other countries OUTSIDE of the constraints of International laws

Thus bypassing all restrictions , tariff, tax, human rights, climate change legislation - everything
