This is also the Rochester Police - dreadful mishandling of an altered mental status call - which led to their current crisis team, which was unavailable (and they didn't wait for in a low threat situation as they could have) for this 9 y/o!

In both cases there is a failure to use good judgement, make a valid threat assessment, to match in force to situation, failure to choose to wait for safer and appropriate staff/conditions and to use their time wisely. They also treat 'perp' as more object than human.

By the way... Rochester is near Buffalo - where this happened...
