THREAD

1)

A year ago today, #Iran's IRGC deliberately shot down Ukrainian flight #PS752, killing all 176 on board.

Regime officials have lied from day one & just recently blamed it on "U.S. adventurism."

#PS752JUSTICE

My take:

<https://t.co/HgABnVqXUI>

2)

Ukrainian forensics chief Alexander Ruvn suggested from evidence obtained that passengers on flight PS752 were out of

their seats before two missiles hit the plane outside Tehran, capital of #Iran.

#PS752JUSTICE

3)

"And [yet] we saw the corpses of the dead lying on the ground, without seats...if the people were fastened, they would fall with their seats, as was the case with passengers of [shot-down] flight MH17 [in Ukraine]," he added.

WARNING-GRAPHIC FOOTAGE

4)

The plane was downed on the same morning that Iran launched ballistic missiles targeting US forces in Iraq. Asked why didn't officials clear the skies of passenger planes, one official said it would have revealed Iran's intention to launch the attack.

5)

The Iranian side immediately bulldozed the site of the downed airplane, obviously to hide important evidence. Even their UK ambassador [@baeidinejad](#) lied about this.
