How to Network: Must read for shy people

~ Thread ~

1. Start with Whom You Know

Start slow by networking with relatives and friends.

Once you gain some courage, you can expand to strangers too.

2. Put on a Happy Face

SMILE

This is such a basic rule yet people just don't think about it.

3. Listen to be Heard

Everyone wants to talk about themselves.

If you are shy, be a good listener.

If you let them speak, they will remember it as a great conversation

4. Say their Name

People like to hear their own names.

Calling them by their name would make them more comfortable.

5. Be Yourself

Don't pretend to be an extrovert for networking.

People will respect you for being you, not someone else.

6. Always be Networking

Networking doesn't just happen at the work,

Anything that gets you out of house is networking.

Networking would be easy if you would consider it as fun instead of duty.

7. Be Generous

You don't always need to give back something to network.

Simply make them feel good or successful about themselves,

When you don't have anything else to give back.

Thanks for reading.

If you have learned something from it, Retweet the first tweet to help others.
