Your thoughts determine your success.

Seven Mental Models That Will Make You Wealthy

=Thread=

Whether you like it or not,

you are the sum of your habits.

Successful people understand this.

They know that your habits define you.

They shape you in ways that you may not realize.

These are the 7 Metal Models I personally use to program my mind for financial success.

1. Expect Success

It all comes down to your expectations.

Wealthy people expect to be wealthy.

Unlucky people expect the opposite.

Do you really believe that one day you will be able to become wealthy? You should.

This is the first step.

Everything Comes Down to Frame

Read “Psycho-Cybernetics”

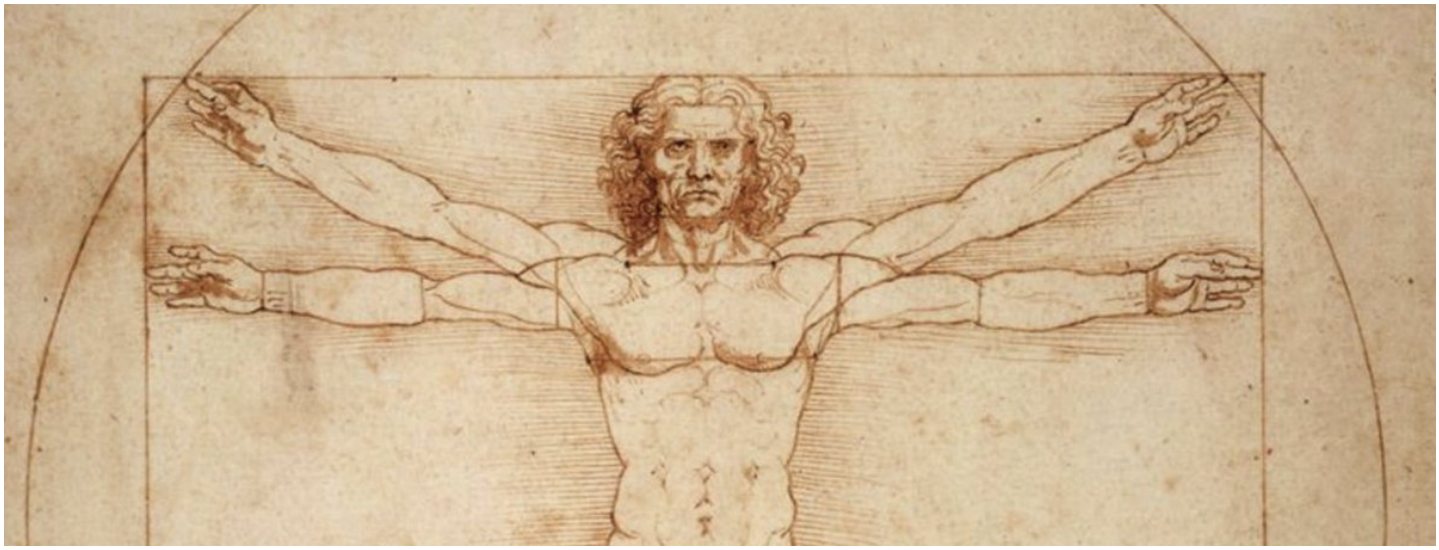

It explains how success/self-image are linked.

You are defined by your mental portrait.

This portrait is a combination of past experiences/feelings.

This image is the foundation of our personality.

If you believe that wealth will elude you, it will.

2. Develop a Growth Mindset

Growth Mindset is the idea that you can develop your own abilities. It is the belief in change.

And when you believe in change,

You will enter a world of possibilities.

When you believe in growing,

Your confidence will improve.

You will seek out opportunities to gain experience.

Experience = Growth

Life will begin to look like an adventure.

Embrace change.

3 Understand Debt is Slavery

Anyone with debt is a slave to the banking industry.
I know colleagues that paid 200K for a college degree and are paying it off in their 40s.

They live in everyday life in fear, just like prisoners.

This is no way for a man to live.

3b Understand Debt is Slavery

I am not saying to avoid all debt. But be smart about it. Understand you need to pay it off quickly.

Once you pay off all your debts.
Your mind will change for the better.

It will become free.
You will sleep better at night.

4. Embrace the Stoic Mindset

You will never have enough when you look at what you own. Society is built to leave you wanting more.

It's a Trap.

Instead, compare yourself to those who are poorer.

Your lifestyle will seem a lot richer.

Wealth is all about perspective.

I recommend Meditations by Marcus Aurelius.

It is a journal of his thoughts.

Think like a Roman Emperor.

Train your mind to focus on what you can control.

You can read Mediations + famous Stoic books here ■

5. Think of Making Money as a Game

I think life like it's a video game.

I apply this same concept to wealth.

Try this thought experiment.

What if life were an actual RPG?

Would your stats be when it comes to money?

Knowledge 81
Vision 90
Work Ethic 60
Salesmanship 45

Leveling-up in life is no different than an RPG.

Complete quests (adventures) to gain experience.

Start taking some Real Life Quests. NOW

Start a side hustle.

Start a business.

Learn how to create value.

It's all up to you.

Understand that everything you do in life has meaning.

What you do, becomes who you are.

You can spend $500 on a PS5 or you can purchase the Agency Course (for much less). Build an empire.

Use your time and energy to level up in real life.

Not virtual.

6 Turn off the TV

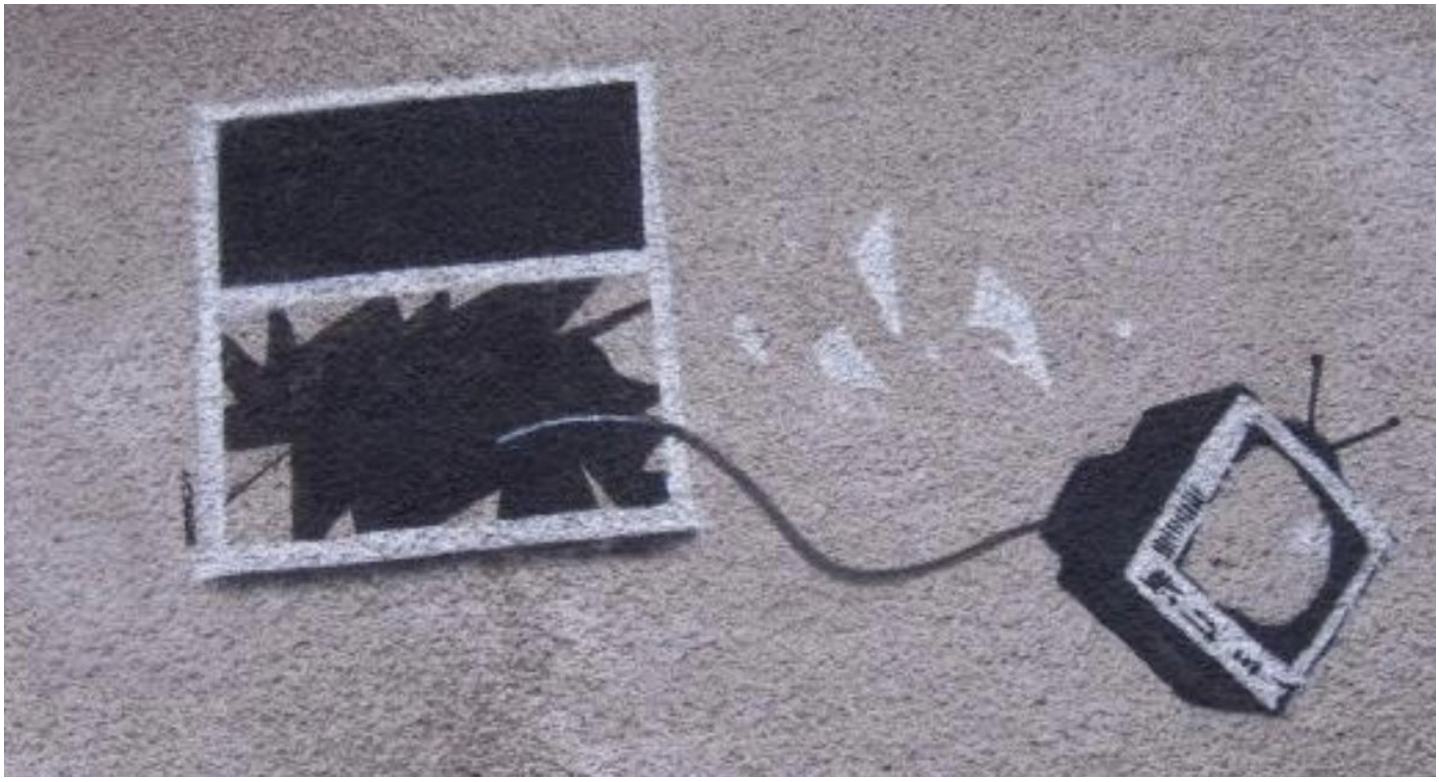

Distance yourself from advertising.

“Throw your TV out the window.” - @robertgriker

Advertising shifts our perception (without you even knowing). It is designed to do that.

Ad executives are trained psychologists.

They know exactly what buttons to push.

Don't believe me? Look around

Everyone buys more than they need.

Why? Because they have been programmed to do so.

Trillions are spent to make you adopt a lifestyle of consumption. That is why most are broke.

They are programmed to be broke.

There is a reason why TV is free.

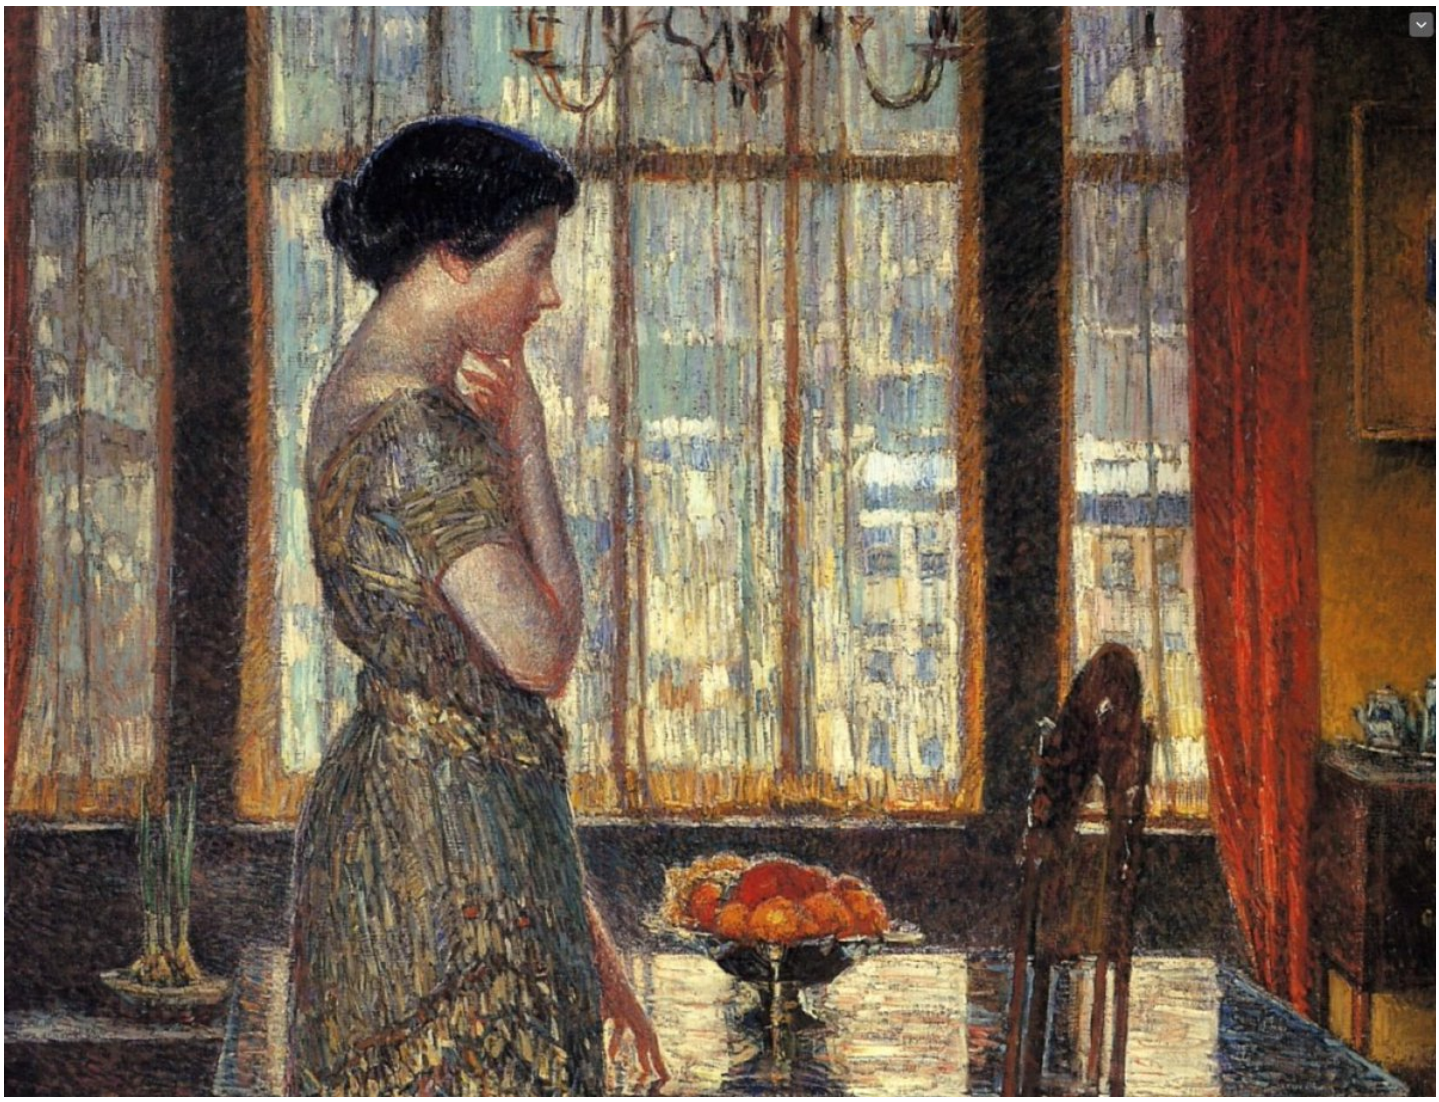

7 Mindset Shift from Consumerism

“Keeping up with the Joneses” is a dangerous mentality.

I literally know people who take out loans, to take out more loans. Limit your time spent with the Joneses.

Instead, keep friends that have the same mentality of building toward wealth.
