

Money from TransMountain Pipeline, Enbridge Risk Management, Richard Bird's construction of Police stations all move through Intratrust linked to Trump and Russia's Rosneft, Jared Kushner etc. <https://t.co/dZO4WgouzR>

So money that goes to fighting Russia, profits Russia. The money to fight climate change funds the nuclear guys who are the oil and natural gas guys. I see this. I wrote this letter to my MP long time ago.

Captured Regulators

From 1950's to 1980's oil companies including Union Carbide, Exxon, Chevron, Conoco and US Steel actively mined uranium. Many of them make money fracking for uranium today.
<http://www.forbes.com/sites/christopherhelman/2013/01/23/fracking-for-uranium/#c88e89f1064c>

Oil pipeline companies like TransCanada owns nuclear infrastructure including 49% of Bruce nuclear reactor A and 32% of Bruce B.
<http://www.transcanada.com/announcements-article.html?id=1591235&t=>

Norvoco and TransCanada both benefit from the privatization of Hydro assets in Quebec and Ontario and both are involved with not only with oil and nuclear but natural gas sectors as well.

Enbridge wants to merge with Spectra and Food and Water Watch is calling on the Federal Trade Commission to review the Enbridge Spectra merger stating that it is anti-competitive and will likely result in higher costs for consumers. The proposed merger would enable Enbridge-Spectra to artificially raise prices on natural gas. Enbridge-Spectra would be a dominant player in the Gulf Coast-Louisiana, U.S.-Canada border and Michigan. more alarmingly they state Enbridge has stated that rapid expansion has led to pipeline safety problems and the proposed deal would add thousands of miles of pipeline to Enbridge's network.

Full report here: http://www.foodandwaterwatch.org/sites/default/files/fww_enbridge-spectra_white_paper_jan_2017.pdf

In Canada, renewable energy is overwhelmingly owned by fossil fuel companies and pipeline companies to the point it is challenging to invest in green energy while divesting from these same firms.

<http://www.cbc.ca/news/canada/calgary/difficult-to-invest-in-green-energy-in-canada-without-big-oil-1.3100233>

If companies stand to profit more by keeping the public dependent on oil and nuclear power for energy supply, they have little corporate desire to promote their cheaper, cleaner renewable energy supplies. This is anti-competitive and creates a situation that may constitute as Abuse of Dominance under Canada's Competitions Act.

http://www.competitionbureau.gc.ca/eic/site/cb-bc.nsf/eng/h_00511.htm

These 44 guys have made 53 billion since Covid 19 in Canada. <https://t.co/y5RgPXYq42>

Bronfmans founded Brookfield. We have a Russian Jewish family who created a company supporting Doha and Qatar Sovereignty funds who are linked to the Muslim Brotherhood. ■ <https://t.co/EMmR1X1HIJ>

Among the areas of focus identified by US Congressional investigators is Brookfield's decision to pay nearly a century of rent in advance when it leased 666 Fifth Avenue in 2018, months before the Kushner mortgage fell due.

<https://t.co/Zug7srcsLe>

The Muslim Brotherhood aims to exploit instability to place itself at the heart of Algeria's oil and gas industry and SNC Lavalin's bribes and Eni's corruption were all part of it. <https://t.co/N1knPbgF9x>

Google SNC Lavalin Nuclear 2020. See all the contracts they are being given Internationally. This is to prevent local green energy from liberating the people from their grip. Nuclear is the same oil, gas, engineering oligarchy. It is anti competitive abuse of dominance.
