Dear DeepState,
We the American People elected D.J.Trump. You thought you knew better. So..we played along as every media called him racist, misogynistic, homophobic, and even illegitimate. We played along as you said Russia interfered with the elections. Cont...

We played along as you accused him of collusion. We played along as you allowed a Mueller investigation. We played along as you said he would fire Mueller. We played along as we found out about Strozk and Page's texts and they were removed. We played along as A Shift said...

"there is Russian collusion in plain sight" and hinted he knew more, which was a lie. We played along as Comey lies were told to us as factual, and he was eventually fired. We played along as you forced AG Sessions to recuse himself. We played along as Bill Barr made promises..

We played along as the House was taken by the Democrats and they did nothing but work to hurt Trump for two years. We played along as they performed the only partisan impeachment in history, and lost in the Senate, because it was baseless.

We played along as you told us there was a whistle blower, but we couldn't say his name. We played along as Epstein didn't kill himself, while in your care! We played along as every day was filled with hate for our choice as President. We played along as Durham failed us.

We played along as our senior citizens were left in nursing homes to die with a dangerous virus. We played along as Democrat States took Lockdown's as a political move against us, just to hurt Trump. We played along as our inner cities were burned down.

We played along as Democrats took over a downtown Democrat run city and called it Chaz. We played along as you called riots "peaceful demonstrations" ! We played along as you devised a plan to commit voter fraud by mail, and said it was because of the virus.

But, I've got one question for you, Deep State! Do you honestly believe that, after all of that, we will play along if you introduce socialism and try to control us?

I got news. You won’t get a chance to put a president in office, if it isn’t @realDonaldTrump.
Have a nice day.
