. In the pandemic's early phase, Sirius XM 68 did something strange.

"In music, a motif is a short musical phrase, musical fragment or succession of notes that has some special importance in or is characteristic of a composition:"

.2 Sirius XM's channel 68 played a succession of songs with similar motifs. These sets occurred about 4—5 times within 24 hours, and they lasted approximately 45 minutes.
https://t.co/3b0lkWL0zN

.3 Each song title and artist was different, yet their motifs were similar.
https://t.co/oMgwbU4SAU

.4 The motifs could be arranged differently, creatively, such as, being inverted.
https://t.co/c4w7CuOorx

.5 But the motif was, generally, recognizable.
https://t.co/MGtQXXYTu8

They could be stylized—different genres.
https://t.co/6JISCZxzY3

https://t.co/bTMX5ng184

.7 Sometimes, the same writer would write others with similar motif, but would change the key, rhythm, and add other interesting twists.
https://t.co/FtphhKrFjF

.8 With extra patience, one can hear the motif that is author stretched……way……out….
https://t.co/sCCkYX7wUk

As you've noticed, by now, some of these songwriters would build on this same motif in several of their compositions: copying themselves in a plagiarized motif. Reminds me of all of the innumerable variations of Pachelbel's Canon.
https://t.co/QL5fKVHE19

A Columbia U music professor taught a session on music cryptography featuring Tchaikovsky and The Five, who would write messages in music containing a coda.

Music Sheet Cipher
https://t.co/Udl7JnDJAV

Imagine transmitting a secret message by using the pitches (from A to G) that are embedded in a musical score.
https://t.co/ZQPqkJIIZI

"What secret messages were sent in songs on the Underground Railroad? Some gave people directions—these were called signal songs. Others, called map songs, told people where to meet. Together, they helped many people make their way northward."
https://t.co/nAtFbMsc4Q

"Taylor Swift hides messages in her lyrics, videos, and social media posts."
https://t.co/xDblW8MHec

Summary of Signature Motifs
"The following list includes only motifs which are known to have been used in published works."
https://t.co/jJFPZ5UbUN

The following are examples of Sirius XM 68's motif:

Ólafur Arnalds - Near Light
https://t.co/4PYb5aA6tM

Here's one that teases the motif in the beginning, and the reveals it at 1:39 and onward.
https://t.co/MwJsc0HJRS

Another variation.
(noticing a couple of the advertisements carry the motif.)
https://t.co/mJSnUYaHgD

Apparat - Caronte (Official Visual)

there are visuals
https://t.co/KUJaZMZV6j

. “Provided to YouTube by Epidemic Sound”

October Skies · Ebb & Flod
https://t.co/Rp73NCzV9V

ODESZA - Kusanagi

Some motif variations are more obvious than others. I’ve mostly left out the songs that left out notes, but left the space in the tune for the missing note.
https://t.co/fBMxVOKxRT

A change of rhythm.
Anywho, you get the drift. Wonder if this no-longer-occurring string of motifs, on Sirius XM 68, meant anything?
https://t.co/YxyZvIde5U

SIRIUS XM
Founders:
Martine Rothblatt
David Margolese
Robert Briskman
https://t.co/ZM6Rb7CrIm

Martine:“…life sciences projects like the Human Genome Project.
She is the founder & chairwoman of the board of United Therapeutics. She was also the CEO of GeoStar & the creator of SiriusXM Satellite Radio. She was the top earning CEO in the biopharmaceutical industry in 2018.”

M Rothblatt (cont.)
..became a convert to Gerard K. O'Neill's "High Frontier" plan for space colonization after analyzing his 1974 Physics Today cover story on the concept as a project for Professor Harland Epps' Topics in Modern Astronomy seminar.

(cont.)

“Rothblatt subsequently became an active member of the L5 Society and its Southern California affiliate of OASIS.”

Somewhere in my tweet history is a fascinating loose connection with (Thomas Stearns) TS Eliot, D.Barr/J.Epstein, Georgia O 'Keeffe, the failed Bear Stearns (where D.Barr got Epstein his 2nd real job), UN refugee dept., human trafficking & NYC LGBT movement. Need to recover it.

"After pharmaceuticals, Rothblatt invested in stem-cell-like cancer therapies. She also joined a xenotransplantation project, one that would essentially grow human organs in genetically modified pigs — she owns her own xeno-pig farm called Revivicor."
https://t.co/6UellUURK3

"In order for xenografts to succeed for any application, it is imperative to stop the first line of immune response to cross-species transplantation; termed Hyperacute Rejection (HAR)."
