4 Popular uses of moving averages

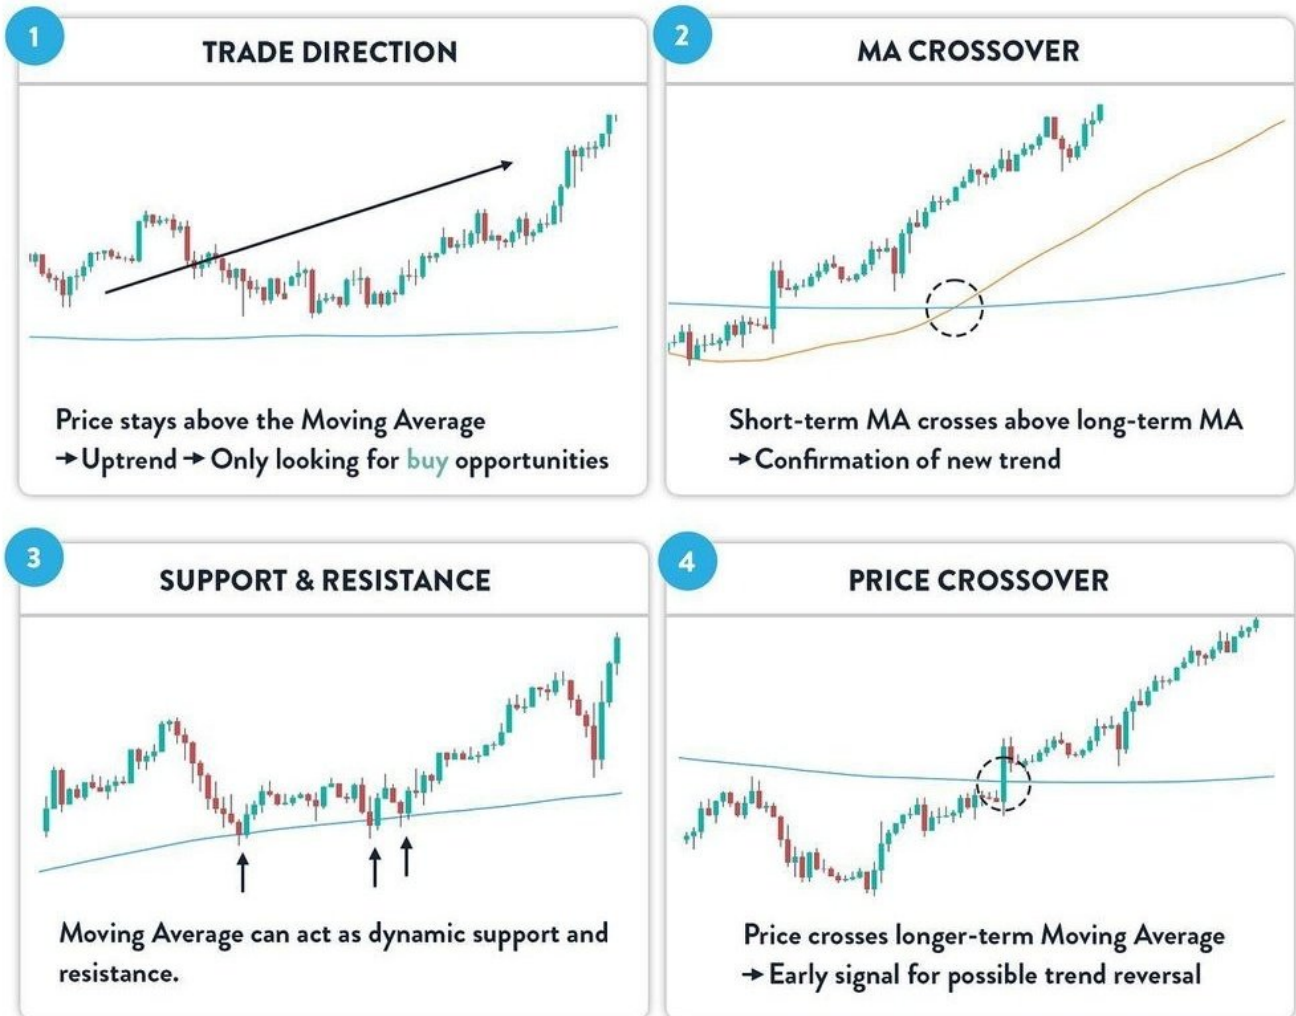

1. Identifying the direction of trend
2. MA crossover
3. Dynamic Support and Resistance
4. Price Crossing above Key EMAs

Note : In chart 21 ema is red , 50 ema is green and 200 ema is black

2/n

MOVING AVERAGE

4 POPULAR METHODS

Why EMA and not SMA ?

EMA is fast , accurate and prices in recent data !

3/n

SMA vs. EMA

Simple Moving Average	Exponential Moving Average
Slow Moving And Smoother Average	Quick Moving And Sensitive To Recent Price
Eliminates Most Fakeouts	More Prone To Fakeouts
More Lag	Less Lag
Overall Trend And Major Support & Resistance	Faster Response To Price Movements
Longer Time Frames	Shorter Time Frames
Less Volatile Markets	Volatile Markets
Mid-term To Long-term Trading	Short-term Trading

Use 1 : Identifying the trend of stock on dtf

The 21 ema will tell us the Short term trend of a stock , while the 200 ema will tell us the long term trend of a stocks

Any EMA that is sloping

:upwards trend is BULLISH

:sideways trend is NEUTRAL

:downwards trend is BEARISH

4/n

TradingView

MOVING AVERAGES SIDEWAYS:

When Moving averages turn flat means the stock is in consolidation and is in sideways zone .
Generally this occurs after an uptrend or downtrend and may lead to continuation of previous trend .
This is generally no trading zone for swing traders

5/n

TradingView

1. Whenever ema is sloping upwards its called uptrend
2. Whenever ema is sloping downwards its called downtrend

3. Whenever ema is sideways its called consolidation

■ Buy in uptrend

■ Sell in downtrend

Whenever stocks move too away from ema it is extended and pullsback

EMA CROSSOVER

1. Whenever the 21 ema crosses 50 ema from down to up short term trend changes from bearish to bullish and vice versa.

2. The 21 Should be above 50 ema for uptrend and below 50 ema for downtrend

Ex:

7/n

TradingView

Crossover rules:

Crossover shouldnt be traded solely as it can lead to multiple signals of buy and sell ,always use confirmation of volume , price etc to take trade .

During consolidation you will get many signals and hence its not advised to use during sideways trend

8/n

50 and 200 ema crossovers

50 cutting 200 from down : Golden Cross

50 cuttinf 200 from up : Death Cross

The Long term trend changes when DEATH CROSS happens and its one of the most dangerous situations

Price falls raidly after the Death Cross

9/n

TradingView

DYNAMIC SUPPORT AND RESISTANCE

1. 21 ema Dynamic support for trending stocks in short term
2. 50 ema dynamic support for mid term
3. 200 ema dynamic support for long term

Examples Explained !

10/n

TradingView

PRICE CROSSING ABOVE 200 EMA

200 EMA : THE LONG TERM TREND

1. When a stock price crosses its 200-day moving average, it is a technical signal that a reversal has occurred.

11/n

3. A simple rule of not buying stocks below 200 ema for short term trading could save a lot of money

4. One may consider investing in stocks if the stock is below 200 ema only if he is confirmed about the fundamentals of the stock

5. Some may not agree with this and its ok!

12/n

WEEKLY 200 EMA : VERY LONG TERM VIEW:

1. If you use 200 ema on weekly timeframe you can be in a trend for a very long time
2. The sell signs will be given late as we are using weekly timeframe
