Sometimes SL hit and BankNIFTY will back. If hit 475 and goes upto 485-490 and again coming back below 475 then sell gain with 490 as SL.
If again hit then exit straddle and create new straddle with same procedure.

> it will consolidate between 32000-32200 or 32100 to 32300 and u will get theta decay.
>
> This is for normal move. Sudden big move may come anytime. So keep SL in system.
> If u r selling at 350-350 then keep SL in system 475 for both legs.
> Practice it. No need to attend webinar.
