Never trade with loan amount.
My trading is very simple. Selling option based on support and resistance. Time frame: Daily and 75 min.
Keep distance of 1-2% from S & R so one has chance to exit or adjust if trade goes against.
And last one my tgt is 4% pm. Above it bonus.

> Dear Nitesh can you share some idea how you makes successful trade. Please I am in a big loss since I started my journey of stock market in 2017. Then I took 15 lac loan and everything is vanished. Now I am in so much struggle to pay the EMI
