Mitesh Sir's FUTURES BREAKOUT TRADES 101:

- How to pick stocks at right time?
- What to look for?
- Importance of BO post consolidation
- How to manage SL
- How to get huge profits
- Multiple Examples

In collaboration with [@niki_poojary](#)

Mitesh Patel's Futures Breakout trades 101:

Importance of Trading only BO or BD stocks by @Mitesh_Engr Sir: ■

• Two questions to always ask:

~ Why stock is going up/down and when?

~ Who is behind big up/down and when?

- Trade only stocks with Momentum
- Instant results
- Small SL or huge profits

Importance of trading only BO or BD stocks

- Ask these two questions:
 1. Why is the stock going up/down and when?
 2. Who is behind big up/down and when?
- Everyday all stocks will not up/down more than 4-5%.
- If all stocks move in the same % range then the Index will also move by same velocity & that's not possible
- So trade only those stocks which are showing momentum, forget other stocks
- Try to capture the move within intraday or max by 1-3 days (as the momentum fades thereafter), rather than carrying the overnight risk and waiting long enough to capture 4-5%
- As frustration sets in if the stock fails to move within 2-4 days, hence Mitesh Sir plays only range Bo or BD stocks as they yield instant results
- Either small SL or huge profits

@Mitesh_Engr Sir's take on how to Trade: ■

- Observe fight between buyer & seller
- Position will be created within first 3 hours
- Operators will win
- Just find BO or BD
- Look for huge volume support
- Give company to operators
- ATP importance explained

Mitesh Patel's take on how to trade

- Everyday there's a fight between Buyers & Sellers (in our parlance its between operators & retailers)
- Usually the position is created within the first one to three hours
- Post that keep observing the trend
- We know the operators will end up winning
- So if there is a BO or BD with huge volume all one has to do is just go with the winners (i.e. the operators)
- Simple trading rule to remember:
 - ***"If a stock has to go up full day then it will not give intra correction more than 1.5% from CMP and will always trade above ATP. Vice versa for down move"*** – Mitesh Patel

How to take trade in Breakout/Breakdown stocks by [@Mitesh_Engr](#) Sir: ■

- Check Support & Resistance
- Wait for 2-3 months consolidation
- Surge in volumes
- Trade on 3 min charts
- Small SL
- Keep trailing
- Always pyramid in profit

How to Take trades in BO/BD stocks?

1. Check the **support & resistance** of a particular stock
2. If the stock is **consolidating ~2-3 months** then the BO or BD from such a consolidation is more powerful
3. Whenever there is a powerful BO or BD it has to be **backed by volume**
4. Huge volume indicates presence of big boys, so we have to just follow them
5. Take entry on the basis of 3min Charts (future/cash as per your risk profile)
6. SL is usually small
7. Always keep trailing your SL to protect your profits
8. Keep pyramiding, as the allocation of your capital is the key for the growth of your portfolio
9. If someone is buying/selling with huge volume, then that upmove /download is not for retailer to exit at the high level,

When and Why to Pyramid? By [@Mitesh_Engr](#) Sir

- Adding to winning positions
- Signals of continued strength
- Potentially large profits
- An Example of pyramiding in one of his trades

When & Why to Pyramid?

1. Pyramiding means adding to profitable positions
2. So as and when you get an affirmative feedback from the market, that where you have to keep adding more
3. Add to positions that are turning profitable and showing signals of continued strength
4. Pyramiding allows for large profits to be made as the position grows
5. Pyramiding is usually done when the stock is sideways or silent

Deep pocket traders can create the momentum

One needs only 10 crore to create 3% of total Future Trading volume within the first hour in morning.

Deep pocket traders can create the momentum

- A trader need only 10 cr to create 3% of total future trading volume within an hour in morning in liquid F&O stocks:
 - Tata steel : 3%
 - Hindalco : 6%
- If you have money then you can make any pattern in chart or create gann date 😊

Consolidation in uptrend followed by a BO - by @Mitesh_Engr Sir

- This is one of Mitesh Sir's favourite pattern.
- IGL example is a textbook example
- Bharti example look for volumes in downmove
- Less volumes during downmove
- Gives conviction for further uptrend

Consolidation in uptrend followed by a BO

Tech Mahindra trade of @Mitesh_Engr Sir explained:

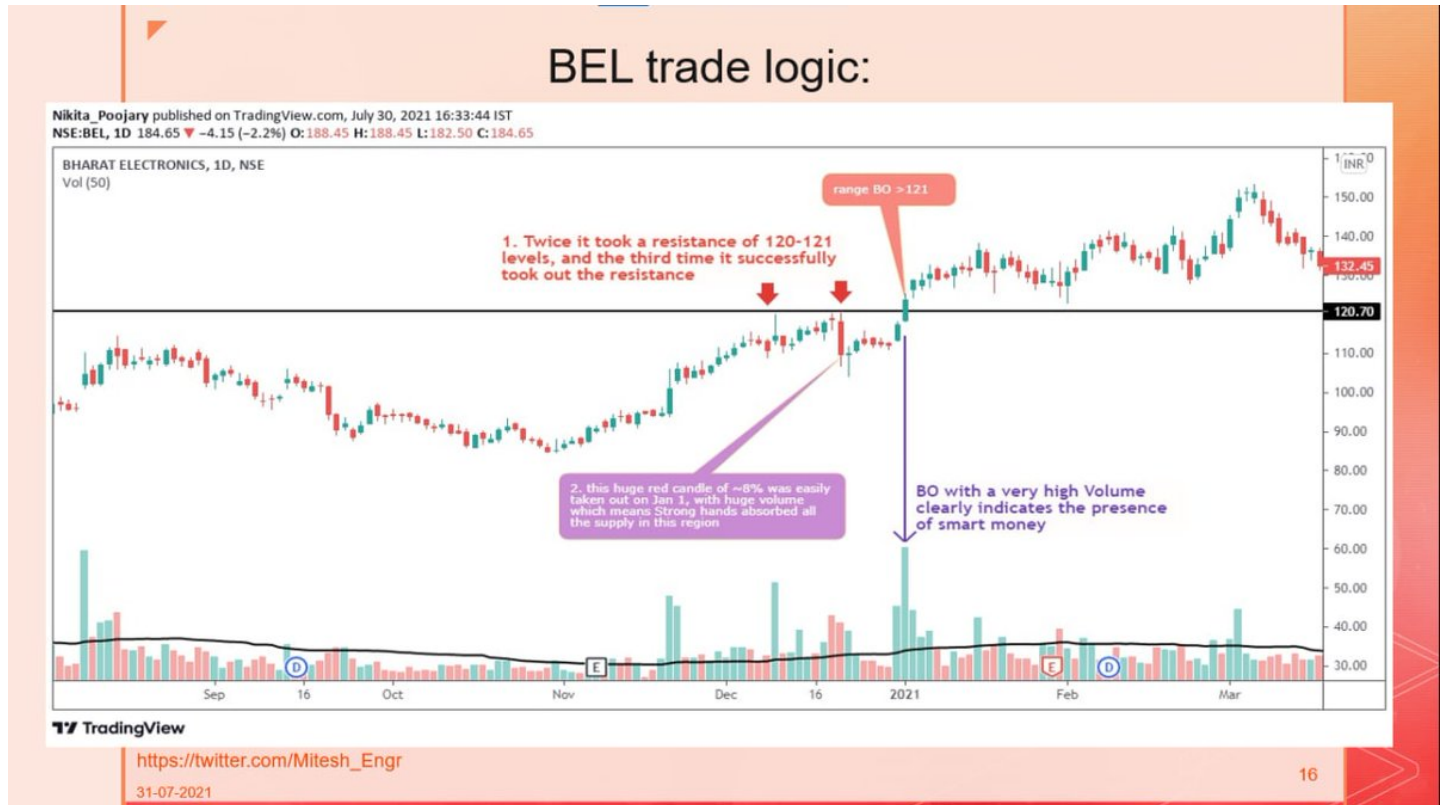

- Tech M was consolidating near higher levels
- Gapped up with huge volumes
- Operators in total control

How Mitesh Patel trades in intraday – TechM example

BEL Breakout Trade by @Mitesh_Engr Sir

- Resisted a level two times
- Third attempt with volumes
- Smart Money is interested
- Give company to smart money to make money
- Picked the trade at the right time
- Rejected a big red candle with upmove

Wipro Trade Explained by @Mitesh_Engr Sir:

- Up with volumes
- Not correcting much
- Not going up for retailers to sell
- Learn to put a SL the way shown

Wipro – Trade example

Muthoot Finance Trade - Fresh ATH Trade by @Mitesh_Engr Sir explained:

- Strong Volume in Daily
- Detailed explanation on how he traded is explained by himself
- Went long & SL hit
- Bought again while reversing
- Pyramiding done
- Exited with huge profit

Fresh ATH Trade – Muthootfin on daily TF

INFY ADR: Live Trade explained on twitter on [@Mitesh_Engr](#) Sir's handle

Mitesh Sir was explaining how he would trade looking at INFY ADR.

- Buy above high, Sell below low
- Buy triggered
- SL at cost when it went up further
- SI hit
- Again re-entry

Infy ADR: Trade example

- Buy above 12.1 or will sell below 11.85

What to do after trade is successful?

An example of what he did in Hindalco.

- Booked long & sold Otm puts
- Risked profit further
- If stock reverses sell calls
- Ready to short futures too if reverses
- Follow the market

Made around 3.7 lakh profit on a 26 lakh account.

Warning: Futures Trading is highly risky

Venture into it only after you've made decent percentage gain on your capital.

Try to avoid before that.

Money leaves your account faster than it comes when you don't know what you're doing in futures.

WARNING: These stunts are performed by a trained professional (THE BOSS), please don't try this at home or anywhere else.

- Futures trading are highly risky and injurious to your capital, so don't venture out if you are not well versed in this. Keep observing & practicing on charts and /or take position in cash basis your ideal position sizing

Mitesh Patel @Mitesh_Engr · Mar 15, 2020

Replying to @ManojKanjolia

I will suggest you to skip trading in future and do only index option writing. Wait for volatility to calm down. Preserve your capital.
