Fake Breakout?
or
Correct Breakout
How to trade this setups? See below:

Is the pole flag Pattern breakout done?

or do we need to close above
previous high for clear conviction?

You will find similar setup across the
sector Stocks
So How can trade this setup?
We don't know whether this is
confirmed breakout or Fake
Breakout?
Lets initiate 1 position if price
crosses previous high
Lets Pyramid if price closes in ATH
zone again.
Stop Loss -> I will keep the
immediate support zone marked
