Sharing a simplest ever to trade options.

Chalk out Support & Resistance.

Play contra.

Like make bullish positions on support

Or

Bearish on resistance.

Bullish means sell ATM PE & OTM CE

or bearish means ATM CE & OTM PE

Exit if support or resistance broken.

As it gonna be a trending day.

Hold another leg to breakeven.

If moves comes into favour, one gonna make awesome.

Note:- Don't let winners becomes looser in case strong move in favour comes.

I m sure , you won't loose much but gain good if you win 50% times.

Moreover you gonna be right around 70% of times.

practice on regular basic to gain confidence.
