**Why we sold only CE's today ?**

**A small ■**

**Collaborated with @AdityaTodmal**

- BNF reversed from 32155 (low made on Mar'8)
- One side rally to butcher the CE writers
- Gap up opening by ~1300 points
- From Mar'8 low till today open ~2800 point rally
- 2800 point rally in just 1.5days
- Trend on the larger TF still bearish
- Due to election results we decided no to carry any overnight positions
- Selling PE on the back of 2800 point rally would have been disastrous due to unfavorable R/R
- So we were very clear to short only CE's
- But then need to follow the trend
- We decided to short CE at the break of first 5min candle
- By 9.45 it started to reverse

TradingView

- Spotted M pattern at the resistance and started shorting CE's thereafter i.e. post 12.12 hours

Nikita\_Poojary published on TradingView.com, Mar 10, 2022 17:01 UTC+5:30

TradingView

- Also BNF resisted at the weekly Channel BD re-test zone

Nikita\_Poojary published on TradingView.com, Mar 10, 2022 17:02 UTC+5:30

#### • Patterns Made in BNF:

1. W pattern near lows, made on March 8,  
(near 32115 lows, which is also the 1st demand zone in weekly)
