How to improve Expiry Trading as a Seller and a buyer?

Learning about different concepts, techniques, and data points does this rapidly.

Here are 10 of the best videos on expiry trading:■

Collaborated with @niki_poojary

1. How to develop a framework to trade in ATM strikes on expiry day? Subhasish Pani on @vivbajaj Sir's channel.

One of call or put at ATM is going to go to zero.

Whichever is moving rapidly has a higher probability of going ATM/ITM. Sell the slower one.

<https://t.co/kx97IEd9aJ>

2. How to trade a big gap up on expiry day?

If market bias is bullish and a gap up happens, it comes for selling.

Can buy puts at the breakout of an inside candle as the market has a good probability of at least heading towards the previous day's close.

<https://t.co/3MZ0ZmMzgL>

3. How to trade in Bank Nifty if it has already moves 160 points from its high to low by 11:30? @ThetaGainers

Sell near otms with double stop loss.

Avoid if stuck in a very small range.

Get out of both by 1pm.

<https://t.co/eaRdJusbC8>

4. Subhasish Pani explains how to play expiry when Nifty and Bank Nifty both are behaving differently.

By the way, his zero to hero logics are:

1. Big candles are supports/resistances
2. Gaps act as S/R
3. Closing price acts as S/R

<https://t.co/9Lt4B9vqEp>

5. How to use data points to trade expiry? [@ThetaGainers](#)

Starts by selling 15-20 rs strangles at 9:20 which are very far otm.

By 10:30 am he starts to look at Change in OI strikes on line charts to predict zero strikes.

<https://t.co/Ob8y8BqEAY>

6. Mr. P R Sundar explains how he usually plays expiry days for a flat move most of the time.

Forms a range and sells puts when the market comes down, sells calls when the market is near the high of the range.

Put an SL for all options post 2:30 pm.

<https://t.co/EXc9mxPoNw>

7. How to make a profit post 3pm by exploiting the close price? [@itjegan](#)

Sells straddles, if the call and put premiums are 4x of the other.

Sells whichever options goes below 10 with an SL.

This alone accounts for 10-15% of his expiry day profits.

<https://t.co/tepf9bcH65>

8. Reeyansh from [@ThetaGainers](#) explains how to do gamma scalping on expiry days by buying options.

Waits for a range to form on expiry till 1:30 pm.

If any move comes, buys options with good risk-reward.

Or buy both at 1:30 and square off when double.

<https://t.co/IUr4Y5m4EN>

9. How @itjegan Sir makes a high profit on expiry days?

Re-enters strikes, locks the profits, and keeps re-entering and does adjustments.

Drawdowns are less compared to his profits by doing all these.

<https://t.co/M3RjWXJbnf>

10. How to use PCR and Change in Open Interest to gauge the direction of the expiry?

Explained well by @nitinmurarkasmc and @PushkarRThakur.

Whichever side has a high Change in OI whether call or put look to buy options on the opposite side near VWAP.
